Executive Summary

Global Atomic is a Canadian-listed, Niger-jurisdiction (high-risk) uranium developer whose flagship Dasa Project is under construction, with 80% attributable ownership and a 49% interest in a cash-generating Turkish zinc-recycling JV. The Durrett 10-factor score is 5.3/10. Our sum of the parts (1.3x AISC pad, 0.8 development stage factor, 8% discount rate) gives US\$1.07 / US\$1.62 / US\$3.45 per share at U3O8 of \$85 / \$100 / \$150, against a price near US\$0.28.

The base case (\$100) sits above the US\$1.32 average analyst target (C\$1.862, four analysts, secondary source). The main drags are: (1) US\$550.1M of remaining project cost against about US\$68M of pro forma cash, with the DFC term loan only drawable after a further US\$152.7M of equity is spent; (2) Niger sovereign and export-route risk; (3) 749M fully diluted shares after two discounted raises in 2026.

\$0.276

PRICE (USD)

~\$167M

MARKET CAP

5.3 / 10

DURRETT SCORE

+487%

SOTP UPSIDE (BASE)

Recommendation: HOLD (speculative). The NAV discount remains large at an 8% discount rate, but the equity gap and Niger risk could dilute or impair it; size accordingly. Data Quality Score 7.3/10; the audit lists what remains provisional.

Market cap = price x 604.2M shares outstanding (basic, post-offering; \$207M fully diluted) [3,4]. All figures in U.S. dollars (USD); CAD converted at USDCAD 0.71 (assumed; C\$50M = US\$35.5M per MarketWatch).

Project List

PROJECT	LOCATION	OWNERSHIP	STATUS
Dasa Uranium Project (SOMIDA)	Agadez Region, Niger	80% (Niger govt 20%)	Development and construction; commissioning H2 2028
Befesa Silvermet Turkey JV (zinc)	Iskenderun, Turkiye	49%	Producing; US\$3.9M dividends YTD 2026

Table 1. Sources: company releases of Sept 18 and Aug 13, 2026 [1]. All figures in U.S. dollars (USD); CAD converted at USDCAD 0.71 (assumed; C\$50M = US\$35.5M per MarketWatch).

Reserves, Resources and Plausible Value

PROJECT	PP	MI TOTAL	MI EX-RESERVES	INFERRED	PLAUSIBLE	ATTRIB. (80%)
Dasa (100%)	73.0	109.3	36.3	51.4	104.7	83.8
Total attributable						83.8

Table 2. Units Mlb U3O8. Source: 2024 Dasa Feasibility Study NI 43-101 (reserves 73.0 Mlb probable, Feb 28, 2024; Indicated 109.3 and Inferred 51.4 Mlb, May 2023 MRE) [2]. Reserves are recoverable, resources are contained. Indicated treated as inclusive of reserves (assumption; unverified). Report is under 3 years old but predates the 2026 cost update. All figures in U.S. dollars (USD); CAD converted at USDCAD 0.71 (assumed; C\$50M = US\$35.5M per MarketWatch).

Plausible = PP x 0.9 + (MI - reserves) x 0.65 + Inferred x 0.3 = 73.0 x 0.9 + 36.3 x 0.65 + 51.4 x 0.3 = 65.70 + 23.60 + 15.42 = 104.7 Mlb. Attributable = 104.7 x 80% = 83.8 Mlb.

10-Factor Analysis

FACTOR	SCORE	RATING	RATIONALE AND SOURCE
Properties / Ownership	7	Good	High-grade, permitted Dasa, 80% owned, but single asset [1,2]
People / Management	5	Fair	Capex up 74% on direct costs and multi-year delays [1]
Share Structure	3	Weak	749M FDS; units sold at C\$0.88 then C\$0.50 [4,5]
Location	2	Poor	Niger junta, border and export-route risk [1]
Projected Growth	6	Fair	Production only from H2 2028; 51 Mlb inferred upside [2]
Good Buzz / Chart	3	Weak	Price near 52-week low after discounted offering [3]
Cost / Financing	8	Good	Padded AISC \$40.94 is 41% of \$100; financing gap judged separately [2]
Cash / Debt	4	Weak	~\$68M cash vs \$152.7M equity requirement; no drawn debt [1,4]
Low Valuation Estimate	9	Strong	EV about \$0.86 per resource lb (160.7 Mlb) [2,3]
Upside Potential	6	Fair	Base NAV ~5.9x price at 8%, just under the 6x bar; timing factor 0.5-0.8 and risk [1]
Total	5.3 / 10		

Table 3. Equal-weighted, scored 1-10 under the Durrett 2.2 rubric. Judgment calls: Cost/Financing scored on AISC only; Location and Management are analyst judgment. Upside Potential moved from 7 to 6 when the discount rate rose from 5% to 8%. All figures in U.S. dollars (USD); CAD converted at USDCAD 0.71 (assumed; C\$50M = US\$35.5M per MarketWatch).

Radar Chart

Valuation: Sum of the Parts

Margin per lb = metal price minus padded AISC ($1.3 \times \text{US\$}31.49 = \text{US\$}40.94$). Annual attributable pounds ($83.8 / 23 \text{ years} = 3.64 \text{ Mlb}$) are discounted at 8% with mid-year timing from first production (H2 2028, about 1.75 years out) and multiplied by the 0.8 Development stage factor. Remaining capex ($\text{US\$}550.1\text{M}$, including finance costs and working capital) is discounted at 8% in four equal steps over 2 years to $\text{US\$}500\text{M}$. The 8% rate is a client override of the 5% default.

PROJECT	ATTRIB. Mlb	START yrs	LIFE yrs	AISC	PADDED AISC	STAGE
Dasa	83.8	1.75 (assumed)	23	31.49	40.94	0.80

Table 4. AISC: 2024 Feasibility Study, 12-year average $\text{US\$}31.49/\text{lb}$; life-of-mine AISC not verified and the 2026 cost update may raise it (assumption) [2]. All figures in U.S. dollars (USD); CAD converted at $\text{USDCAD } 0.71$ (assumed; $\text{C\$}50\text{M} = \text{US\$}35.5\text{M}$ per MarketWatch).

USD MILLIONS	LOW \$85	BASE \$100	HIGH \$150
Dasa NAV, stage-weighted (0.8)	1,209	1,621	2,994
Less future capex (PV at 8%)	(500)	(500)	(500)
Less net debt	0	0	0
Plus cash and other assets (cash 68, zinc JV 25)	93	93	93
Equity value	803	1,214	2,587
Per share (749.3M FDS)	1.07	1.62	3.45
vs. current price (\$0.276)	+288%	+487%	+1,151%

Table 5. Capex: company release Sept 18, 2026 [1]. Cash: US\$30.0M at Jun 30 plus about US\$38.4M net of 5% fee from the C\$56.97M offering (FX assumed); H2 burn not deducted [1,4]. Debt: none disclosed; DFC facility undrawn. FDS = 604.2M basic + 82.4M (C\$1.15) + 57.0M (C\$0.70) + 5.7M underwriter (C\$0.50, assumed at 5% of units, unverified) warrants; options/RSUs not verified and excluded. Zinc JV at US\$25M is an analyst estimate (about 5x annualized dividends). All figures in U.S. dollars (USD); CAD converted at USDCAD 0.71 (assumed; C\$50M = US\$35.5M per MarketWatch).

Figure 1. SOTP per-share cases vs. analyst average and price (8% discount rate).

Sensitivities

CASE	BASE PRICE	PER SHARE	VS. BASE
Base case (8%)	\$100	\$1.62	n/a
Key-asset NAV haircut (-25%)	\$100	\$1.08	-33%
Equity raise (\$152.7M at C\$0.50, 430M new shares)	\$100	\$1.16	-28%
Memo: 5% discount rate (prior case)	\$100	\$2.35	+45%

Table 6. Illustrative; the haircut and raise cases are analyst judgment.

Analyst Cross-Check

SOURCE	RATING	TARGET (USD)
MarketScreener consensus (4 analysts, as of Sept 18, 2026)	Buy	\$1.32 (C\$1.862 average)

Table 7. Secondary source [5]; targets pre-date the Sept 23 offering. All figures in U.S. dollars (USD); CAD converted at USDCAD 0.71 (assumed; C\$50M = US\$35.5M per MarketWatch).

Input Assumptions Disclosure

INPUT	VALUE	BASIS
Metal price scenarios, flat	\$85 / \$100 / \$150	Client scenarios, not a forecast
Discount rate / cost pad	8% / 1.3x	Client instruction (8% overrides 5% default)
Capex	US\$550.1M remaining	Company release, Sept 18, 2026
FX	USDCAD 0.71	Assumption (secondary)
Cash / debt	\$68.4M / \$0	Company Q2 plus offering; estimate
Shares	749.3M FDS (604.2M basic)	MarketScreener-derived and offering release; options not included
Start / life	H2 2028 / 23 yrs	Company Q2 release; 2024 FS

Table 8. Secondary-source inputs and assumptions are labeled.

Capital Raise Outlook (18 months)

Probability of a meaningful raise: 90%. Forced raise: 40%. Liquidity of roughly US\$68M compares with US\$152.7M of equity needed before the DFC loan is available, plus a US\$16.8M overrun facility. This section is analyst judgment, not a sourced forecast.

Red Flags and Investor Concerns

Red Flag: Technology / execution risk: Dasa is unbuilt; project cost rose from US\$227.5M to US\$777.6M, first production slipped to H2 2028, and the DFC loan is conditional on an export route and permit extensions. Evidence for: US\$228.5M already spent and underground development ongoing. Evidence against: no commissioning date is fixed and the border remains closed [1].

Red Flag: Share Structure (3): about 749M fully diluted shares after units at C\$0.88 and C\$0.50; a further US\$152.7M equity requirement implies more dilution [4,5].

Red Flag: Location (2): Niger political and sovereign risk; export-route and permit conditions are unresolved [1].

Red Flag: Good Buzz / Chart (3): shares fell sharply after the discounted offering and trade near 52-week lows [3].

Red Flag: Cash / Debt (4): about US\$68M pro forma cash against US\$152.7M of equity needed before the DFC loan can be drawn [1,4].

Red Flag: People / Management (5): capex overruns and schedule slips since the 2024 Feasibility Study [1].

Observations and Next Steps

Catalysts: DFC loan documentation, export-route agreement, offtake or JV partner, Q3 results. Verify: updated NI 43-101 and life-of-mine AISC, option/RSU and underwriter-warrant counts, post-offering cash, JV dividend run-rate.

Data Quality Audit

Data Quality Score 7.3/10 (accuracy 6.5, hallucination control 8.0, sycophancy 8.0; weighted 0.5 / 0.3 / 0.2). Verified against primary sources: reserves and resources, remaining capex, cash, warrants, offering terms. Provisional or secondary: stock price, analyst target, FX, option counts, underwriter warrants, AISC (12-year figure), zinc JV value, start date.
