Executive Summary

Lotus Resources is a Tier 2 (Malawi and Botswana) uranium producer-developer: the 85%-owned Kayelekera mine in Malawi restarted in August 2025 and is still ramping up, and the 100%-owned Letlhakane project in Botswana is at scoping-study stage [1][2][3][7]. The Durrett 10-factor score is **4.9 / 10**. Our sum of the parts (1.3x AISC, stage factors, **8% jurisdiction discount rate**, corporate overhead and Letlhakane funding) gives **\$0.35, \$0.59 and \$1.00** per fully diluted share at U3O8 of \$85, \$100 and \$150, against a price near \$0.15 [11]. The \$100 case is well above the analyst consensus of about A\$0.28 (about US\$0.19) [6].

Ramp-up execution, funding and dilution are the main drags: FY2026 recovery was only 47% against an 86.7% target, cash was A\$30.2M at June 30 with 1.2 quarters of funding, and the A\$60M offer, A\$35M reset notes and 66.3M warrants more than double the share count [1][2][10][12].

Recommendation: **Hold (speculative)**. Data Quality Score 7.20 / 10; the audit lists what remains provisional.

\$0.15	~\$82M	4.9 / 10	+293%
PRICE (USD) [11]	MARKET CAP [11][12]	DURRETT SCORE	SOTP UPSIDE (BASE)

Recommendation: Hold (speculative). Modeled value is a multiple of the price, but the market is discounting the ramp-up record, Malawi risk and further dilution; size positions small.

Market cap = \$0.15 x 546.8M shares outstanding after the 1-for-1 offer (273.4M before plus 273.4M new) [12][13]; aggregator figures range from US\$80M to US\$82M [6][11]. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Project List

PROJECT	LOCATION	OWNERSHIP	STATUS
Kayelekera (open pit, acid-leach mill)	Karonga, Malawi	85% (Government of Malawi 15%)	Producing, ramping up; 332.1 klb made in FY2026; paused Jun 10, resumed Aug; first export shipment (about 144,000 lb) pending permits [1][4][5]
Letlhakane	Botswana	100%	Scoping study (Mar 2025); infill drilling under way; PFS and updated MRE targeted H2 CY2026 [1][7][17]
Livingstonia	Malawi	85%	Inferred resource only (4.8 Mlb); not valued [1][2]

Table 1. Sources: [1][2][4][5][7][17]. Tenement ownership per the June 2026 quarterly [1]. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Project Locations

Figure 1. Schematic map, not to scale; positions approximate. Product is trucked from Kayelekera through Zambia to Walvis Bay, Namibia, for shipment to Orano's conversion plant; the Dar es Salaam route was cancelled [1][5]. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Reserves, Resources and Plausible Value

PROJECT	P&P	M&I total	M&I ex-reserves	INFERRED	PLAUSIBLE	ATTRIBUTABLE
Kayelekera (100%; 85% attrib.)	23.0	37.4	14.4	8.9	32.73	27.82
Letlhakane (100%)	0.0	56.8	56.8	56.9	53.99	53.99
Livingstonia (85%, not valued)	0.0	0.0	0.0	4.8	1.44	1.22
Total attributable						83.03

Table 2. Millions of pounds U3O8, contained basis. Resources are inclusive of reserves; reserves are recoverable. Verified against the company's tables: Kayelekera measured 1.6 + RoM stockpile 2.6 + indicated 33.2 = 37.4 M&I, inferred 7.4 plus 1.5 low-grade stockpile (46.3 total), reserves proved 1.2 + RoM stockpile 2.6 + probable 19.2 = 23.0 (Dec 2025 half-year report, based on the 2022 resource and reserve) [2]; Letlhakane indicated 56.8 and inferred 56.9 (Dec 2024 MRE, still current) [3]; Livingstonia inferred 4.8 [2]. Kayelekera tables are not depleted for 332 klb produced [1]; the 2022 reserve is older than 3 years (flagged outdated). All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Plausible = P&P x 0.9 + (M&I minus reserves) x 0.65 + Inferred x 0.3. Kayelekera: $23.0 \times 0.9 + 14.4 \times 0.65 + 8.9 \times 0.3 = 20.70 + 9.36 + 2.67 = 32.73$ Mlb contained (x85% = 27.82). Letlhakane: $56.8 \times 0.65 + 56.9 \times 0.3 = 36.92 + 17.07 = 53.99$ Mlb. Livingstonia: $4.8 \times 0.3 = 1.44$ (x85% = 1.22), not valued. Recoverable plausible (used in valuation): Kayelekera reserves $20.70 + (9.36 + 2.67) \times 86.7\%$ target recovery = 31.13 (x85% = 26.46); Letlhakane $53.99 \times 64\%$ (scoping: 45 Mlb mill feed gives 29 Mlb produced) = 34.79 Mlb [2][3].

10-Factor Analysis

FACTOR	SCORE	RATING	RATIONALE
Properties / Ownership	7	Good	Kayelekera 85% (producing, ramping up) plus 100% of Letlhakane, 113.7 Mlb [2][3]
People / Management	4	Weak	Grade/recovery data retracted then restated; no independent directors; CCO left Sep 2026 [1][6]
Share Structure	2	Weak	546.8M basic shares after a 1-for-1 offer; A\$35M reset notes and 66.3M warrants [10][12][15]
Location	4	Weak	Malawi and Botswana; export via Zambia and Namibia still awaiting final permit [1][5]
Projected Growth	7	Good	From about 0.1 Mlb/yr run-rate to 2.4 Mlb/yr, plus about 3 Mlb/yr Letlhakane potential [1][4][7]
Good Buzz / Chart	2	Weak	Down about 92% in 12 months, at its 52-week low; 52-wk range US\$0.14-\$2.30 [6][11]

FACTOR	SCORE	RATING	RATIONALE
Cost / Financing	4	Weak	FY26 recovery 47% vs 86.7% target; Q2 opex A\$24.6M for 156 klb vs AISC target US\$45/lb [1][2]
Cash / Debt	4	Weak	A\$30.2M cash at Jun 30 (1.21 quarters of funding); relies on A\$60M offer, A\$35M notes and Mercuria [1][5]
Low Valuation Estimate	8	Strong	EV about US\$55M vs about 80 Mlb attributable plausible lb; overhead and funding reduce the margin [11]
Upside Potential	7	Good	SOTP at \$100 is about 3x price after overhead and funding, but depends on ramp-up [Table 5]
Total	49 / 10 =	4.9	

Table 3. Equal-weighted, scored 1-10 under the Durrett 2.2 rubric. All scores are judgment calls; Share Structure and Cash/Debt reflect the dilution and funding analysis in Table 9. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Radar Chart

Valuation: Sum of the Parts

Margin per lb = U3O8 price minus 1.3x AISC. Production is even over mine life at the plant rate (Kayelekera 2.4 Mlb/yr at 100%, or 2.04 attributable; Letlhakane 3.0 Mlb/yr), so life = recoverable plausible lb / annual rate: 13.0 and 11.6 years. Cash flows are discounted at **8% (mid-year), reflecting Malawi and African jurisdiction risk**, multiplied by the stage factor. Kayelekera's remaining capex, Letlhakane's capex and corporate overhead (US\$8.7M per year over 14 years) are deducted at present value. Letlhakane is not built if its NPV is below capex (floored at zero); when it is built, 40% of capex is funded by equity at an assumed US\$0.30 per share and 60% by project debt costing the discount rate. Pre-FID work (US\$15M) is funded by equity at US\$0.15.

PROJECT	ATTRIB. Mlb	START (yrs)	LIFE (yrs)	AISC \$/lb	1.3x AISC	STAGE
Kayelekera	26.46	1.0	13.0	45.00	58.50	0.80
Letlhakane	34.79	5.5	11.6	41.10	53.43	0.40

Table 4. Attributable Mlb are recoverable plausible pounds (Table 2 notes). AISC: Kayelekera about US\$45/lb steady state (company guidance) [4], although FY2026 actual operating cost is far higher (A\$24.6M for 155.9 klb in the June quarter) [1]; Letlhakane has no published AISC, so the scoping-study cash cost of US\$41.1/lb is a proxy excluding sustaining capital [7]. Capex: Letlhakane US\$465M plus US\$23.5M = US\$488.5M at 4.5 yrs [7]; Kayelekera to complete from Jul 1: restart close-out US\$2.0M, grid US\$9.7M, TSF US\$16.6M = US\$28.3M at 0.5 yr [1]. Overhead: A\$12.57M FY2025 selling, general and administrative cost (US\$8.7M) held flat [18]. Start 1.0 yr (Kayelekera) and 5.5 yrs (Letlhakane; PFS not yet complete, no FID) are assumptions. Stage 0.80 and 0.40 follow the Denison convention. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

USD MILLIONS	\$85	\$100	\$150
Kayelekera NAV (stage-weighted)	328.5	514.4	1,134.2
Letlhakane NAV (stage-weighted)	190.2	280.6	581.8

USD MILLIONS	\$85	\$100	\$150
Project NAV	518.7	795.0	1,715.9
Less: Kayelekera capex to complete (PV)	(27.2)	(27.2)	(27.2)
Less: Letlhakane capex (PV)	(345.5)	(345.5)	(345.5)
Floor: Letlhakane not built if NPV below capex	155.3	65.0	0.0
Plus: Letlhakane equity raise proceeds (PV, if built)	0.0	0.0	138.2
Less: corporate overhead (PV)	(74.3)	(74.3)	(74.3)
Less: debt, notes and delivery liabilities	(38.3)	(38.3)	(38.3)
Plus: cash (pro-forma Sep 30, estimate)	65.9	65.9	65.9
Equity value (notes added back if converted)	278.6	464.6	1,458.8
Fully diluted shares (M), see Table 5a	786.7	787.1	1,465.3
Per fully diluted share	\$0.35	\$0.59	\$1.00
vs. current price (\$0.15)	+136%	+293%	+564%

Table 5. Debt = equipment finance US\$7.2M [1] + A\$35M zero-coupon notes at face US\$24.1M [16] + maximum CY2026 delivery settlement US\$7.0M [1]. Cash = A\$30.2M at Jun 30 [1] + A\$60.1M offer and A\$35M notes, each less an assumed 4% costs, less an assumed A\$26.0M Jul-Sep operating burn = A\$95.5M at 0.69; restricted cash of US\$10M is excluded; replace with the Sep-quarter report (late October). Debt-funded Letlhakane capex (60%) costs the discount rate and so has no net effect; only the equity portion adds shares. The undrawn Mercuria US\$30M facility is excluded. Letlhakane is not built at \$85 or \$100 (NAV below capex), so no construction equity is raised in those cases. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Table 5a. Fully diluted share count

COMPONENT	\$85	\$100	\$150
Basic shares (273.4M before offer + 155.5M institutional + 117.9M retail) [12][13]	546.8	546.8	546.8
Performance rights (options of 173,914 at A\$3.45 are out of the money) [14]	1.6	1.6	1.6
Pre-FID equity: US\$15M at \$0.15 [assumption]	100.0	100.0	100.0
Letlhakane equity: 40% of capex at \$0.30, only if built [assumption]	0.0	0.0	651.3
Warrants: 66.3M at A\$0.85, treasury method [15]	0.0	0.4	27.2
Convertible notes: A\$35M at A\$0.253, if in the money [16]	138.3	138.3	138.3
Fully diluted shares (M)	786.7	787.1	1,465.3

Table 5a. Pre-offer count and offer sizes from the Appendix 3B and completion announcements [12][13]; rights and options from the Appendix 2A [14]; warrants from the Appendix 3G [15]; notes from the Appendix 3B of Sep 7 [16]. Jun 30 count was 273,218,323; 173,913 more shares were issued before the Jul 27 record date [12]. Other option series were not verified. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Table 5b. Letlhakane funding sensitivity

PER SHARE	ISSUE AT \$0.15	ISSUE AT \$0.30	ISSUE AT \$0.50	ALL DEBT
\$150, built (stage 0.4, as Table 5)	\$0.69	\$1.00	\$1.20	\$1.59
\$100, forced build (stage 1.0)	\$0.46	\$0.66	\$0.80	\$1.01

Table 5b. Value per fully diluted share. Equity issue price is the main driver: at \$0.15, funding Letlhakane at today's price transfers most of the project's value to new holders. The forced-build row shows \$100 uranium with Letlhakane built at full stage weight; the base case at \$100 does not build it. Debt cost equals the discount rate, so all-debt funding is value-neutral except through leverage risk, which is not modeled. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Sensitivities

CASE (\$100 URANIUM, 8%)	PER SHARE	VS. BASE
Base case	\$0.59	n/a
Kayelekera runs at 50% of nameplate (1.2 Mlb/yr gross)	\$0.35	-40%
Kayelekera AISC US\$60/lb (ramp-up costs persist)	\$0.28	-52%
Kayelekera start delayed to year 3	\$0.50	-16%
No corporate overhead deducted (earlier version)	\$0.68	+15%
Discount rate 5% instead of 8% (reference)	\$0.70	+18%

Table 6. Illustrative; every case other than the reference rows is an analyst assumption, not a company figure. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Analyst Cross-Check

SOURCE	RATING	TARGET (USD)
Simply Wall St consensus (4 analysts, Oct 4, 2026)	n/a	About \$0.19 (A\$0.28); down from A\$0.32

Table 7. Source: [6]. Converted at 0.69 USD/AUD. Individual broker ratings were not available. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Input Assumptions Disclosure

INPUT	VALUE	BASIS
U3O8 price	\$85 / \$100 / \$150, flat	Client scenarios; not a forecast. Spot about \$90 [9]
Discount rate / cost pad	8% mid-year / 1.3x AISC	Client instruction (8% for jurisdiction)
Capex by project	Kayelekera \$28.3M; Letlhakane \$488.5M	Company forecast [1]; scoping study [7]
Corporate overhead	US\$8.7M per year	A\$12.57M FY2025 SG&A, secondary [18]; likely understated for FY2026
Letlhakane funding	40% equity at \$0.30; 60% debt; pre-FID \$15M at \$0.15	Analyst assumptions; no financing plan disclosed
FX	0.69 USD/AUD	Company rate [1][16]
Start dates	Kayelekera 1.0 yr; Letlhakane 5.5 yrs	Assumptions; PFS targeted H2 CY2026, no FID
Cash / debt	\$65.9M / \$38.3M	Jun 30 actual [1] plus raises less assumed burn; see Table 5
Shares	546.8M basic; 787.1M fully diluted at \$100	Table 5a [12]-[16]

Table 8. Every secondary-source input and assumption is labeled. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Capital Raise Outlook (18 months)

Probability of a meaningful raise (about US\$25M or more): **about 70%**; forced raise to keep operating: **about 35%**. At June 30, Lotus had A\$30.2M of cash, quarterly outflows of A\$46M (operating A\$26.0M, investing A\$20.3M) and 1.21 quarters of funding; the A\$60.1M offer, A\$35M notes and a US\$30M Mercuria prepayment facility followed [1][5]. Remaining Kayelekera capex is US\$28.3M, and the first export credit is expected in October or November [1]. Lethakane's US\$488.5M capex is unfunded; the base case assumes 40% equity at \$0.30 and 60% project debt, and Table 5b shows that equity at today's \$0.15 would be far more dilutive. The share count is up 132% in 12 months [6].

DATE	EVENT	SIZE	PRICE	NEW SHARES	DILUTION	VALUE / SH. AFTER*
Sep 4, 2025	Placement [6]	A\$65.2M	A\$0.19	343.3M (pre-consolidation)	n/a	n/a
Feb 5-6, 2026	Placement, post 10-for-1 consolidation [6]	A\$76.2M	A\$2.15	35.4M	n/a	n/a
Jul 31 and Aug 20, 2026	1-for-1 entitlement offer [13]	A\$60.1M	A\$0.22	273.4M	+100%	n/a
Sep 7, 2026	A\$35M zero-coupon notes, EGM approved Sep 2 [16]	A\$35.0M	A\$0.253 conv.	138.3M if converted	+25% (to +58% at A\$0.11 floor)	see Table 5
Sep 9, 2026	Detachable warrants to CVI [15]	nil	A\$0.85 strike	66.3M if exercised	+12%	see Table 5a
H2 2027 (assumed)	Lethakane pre-FID work (in base case)	US\$15M	\$0.15	100M	+18%	in Table 5
Dec 2026-Mar 2027 (assumed)	Ramp-up working capital raise	US\$25M	\$0.15	167M	+30%	\$0.51
2028 (assumed, if built)	Lethakane equity at \$0.30 (40% of capex)	US\$195M	\$0.30	651M	+119%	\$1.00 at \$150

Table 9. Historical rows are verified issue dates and sizes [6][13][15][16]; the Feb 2026 price follows a 10-for-1 consolidation between Sep 2025 and Feb 2026, so prices before and after are not comparable. Rows marked assumed are illustrative. *Value per fully diluted share at \$100 uranium (Table 5 basis) plus raise proceeds, except the last row (\$150). Any customer placement under the funding package is not quantified. This section is analyst judgment, not a sourced forecast. All figures in U.S. dollars (USD); Australian-dollar company figures converted at 0.69 USD/AUD (company rate [1]).

Red Flags and Investor Concerns

Red Flag: Ramp-up execution: FY2026 recovery averaged 47% (44% March quarter, 52% June) against an 86.7% target; production paused June 10 on acid supply and furnace refractory failure; Aug-Sep output was only about 100,000 lb and the acid plant runs at 50-60% of design [1][2][5].

Red Flag: Product quality and sales: Orano accepted only 159.5 klb of the 332.1 klb produced, 172.8 klb is off-specification, and CY2026 delivery obligations carry up to US\$7M of settlement exposure [1].

Red Flag: Share Structure (2) and dilution: 1-for-1 offer at A\$0.22, A\$35M zero-coupon notes convertible at A\$0.253 with a quarterly reset to a A\$0.11 floor, and 66.3M warrants at A\$0.85 [12]-[16]. Funding Lethakane at today's price would multiply the share count again (Table 5b).

Red Flag: Cash / Debt (4) and Cost / Financing (4): cash fell A\$55M in the June quarter; June-quarter Kayelekera operating cost was A\$24.6M for 155.9 klb produced, far above the US\$45/lb AISC target; overhead of about US\$9M a year is a further drag [1][18].

Red Flag: People / Management (4): March-quarter grade and recovery data were retracted and later restated; the board has no independent directors; the Chief Commercial Officer and Company Secretary left in September [1][6].

Red Flag: Location (4): Malawi government holds 15%; exports still need final Namibian radiation-authority approval and the Dar es Salaam route was cancelled [1][4][5]. Good Buzz / Chart (2): the stock is down about 92% in a year [6][11].

Observations and Next Steps

Watch the September-quarter report (late October) for actual cash, burn, production and recoveries; the first export shipment and converter credit (October-November); the AGM on November 20, 2026; the sale of the 172.8 klb off-specification inventory; and the Letlhakane PFS and MRE update (targeted H2 CY2026), which should set a funding structure. Verify the reset mechanics of the notes, FY2026 overhead, any other option series and the Kayelekera depleted resource.

Data Quality Audit

Data Quality Score 7.20 / 10 (accuracy 6.7, hallucination control 7.5, sycophancy 8.0; weighted 0.5 / 0.3 / 0.2). Verified against company primary sources: Kayelekera resource and reserve tables [2]; Letlhakane resource [3]; June 2026 cash, debt, capex to complete and production [1]; share count, rights, options, warrants and notes [12]-[16]. Provisional or secondary: price, FX and analyst data [6][11]; overhead (FY2025 SG&A from an aggregator [18]); Jul-Sep burn, offer costs and notes settlement; Letlhakane AISC proxy and funding structure (40% equity at \$0.30, 60% debt, pre-FID \$15M); start dates, stage factors and rates. Changes in this version: overhead and Letlhakane funding added; value per share falls versus the prior \$0.51 / \$0.77 / \$1.90. The Kayelekera reserve is more than 3 years old. The project RAG JSON (merged 2026-01-30) predates the Q1-Q2 2026 results; no Lotus entry was found in the portion retrieved.

Important Disclosures

Fifth Generation Advisers is a registered investment adviser. Registration does not imply a certain level of skill or training. This report is for informational purposes only. It is not investment, tax or legal advice, and it is not a solicitation or recommendation to buy or sell any security. Fifth Generation Advisers is primarily focused on quantitative analysis of stocks and securities; this report does not replace qualitative, fundamental or suitability review. Inputs are drawn from company-published reports and filings (audited financial statements and technical reports where available). Any input taken from a secondary source, or that is an estimate or assumption, is explicitly labeled as such in this report. Models and forecasts depend on assumptions that may prove incorrect. **Do your own due diligence** and consult a qualified professional before making any investment decision. Past performance does not guarantee future results. All figures are in U.S. dollars; Australian-dollar amounts are converted at 0.69 USD/AUD.
