Executive Summary

Ur-Energy is a Tier 1 (USA) uranium ISR producer with the producing Lost Creek plant (mine life to 2039) and the Shirley Basin mine, which began ISR mining in 2026, both in Wyoming [1][3][7]. The Durrett 10-factor score is **5.7 / 10**. Our sum of the parts (1.3x AISC, stage factors, 5% discount rate) gives **\$0.68, \$1.13 and \$2.46** per share at U3O8 of \$85, \$100 and \$150, against a price near \$1.10 [6]. No analyst target data was retrieved, so the base case is not compared with analyst targets.

The main drags are a thin liquidity cushion (about \$95M cash against \$120M of convertible notes) [1][2], Shirley Basin ramp and cost risk (filed all-in cost \$54.89/lb) [4], and a weak chart (price down about 21% year to date) [6]. Recommendation: **Hold**. Data Quality Score 7.40 / 10; the audit lists what remains provisional.

\$1.10	~\$0.44B	5.7 / 10	+3%
PRICE (USD) [6]	MARKET CAP [6]	DURRETT SCORE	SOTP UPSIDE (\$100)

Recommendation: Hold. The \$100 case is about fair value (+3%) and the \$85 case is 38% below the price; the key risk is Shirley Basin execution with limited cash after the convertible.

Market cap = \$1.10 x 397.9M shares outstanding (Jul 31, 2026) [2][6]. All figures in U.S. dollars (USD).

Project List

PROJECT	LOCATION	OWNERSHIP	STATUS
Lost Creek ISR (incl. LC East, LC South)	Sweetwater Co., Wyoming, USA	100%	Producing; life of mine to Q2 2039; record 140,873 lb drummed in Q2 2026 [1][3]
Shirley Basin ISR	Carbon Co., Wyoming, USA	100%	ISR mining began 2026 [7]; 1.0M lb/yr licensed wellfield capacity [4]

Table 1. Sources: [1][3][4][7]. Ownership assumed 100% per company disclosures; not re-verified against the 10-K. All figures in U.S. dollars (USD).

Project Locations

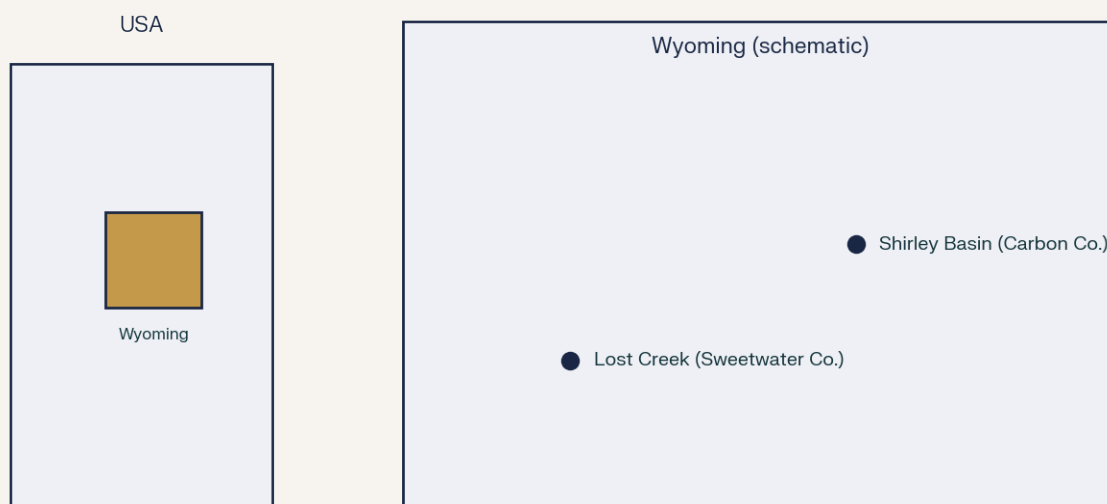

Figure 1. Schematic map, not to scale; positions approximate. All figures in U.S. dollars (USD).

Reserves, Resources and Plausible Value

PROJECT	P&P	M&I total	M&I ex-reserves	INFERRED	PLAUSIBLE	ATTRIBUTABLE
Lost Creek (100%)	none	11.868	11.868	10.357	10.82	10.82
Shirley Basin (100%)	none	9.112 (prov.)	9.112	none	5.92	5.92
Total attributable		20.980	20.980	10.357		16.74

Table 2. Units: Mlb eU3O8, contained. Lost Creek: Measured 8.309 + Indicated 3.559 = 11.868; Inferred 10.357 (S-K 1300 update, effective Dec 31, 2025) [3]. Shirley Basin: technical report shows 8.816 M&I at Dec 31, 2023 (7.521 measured + 1.295 indicated; 80% recovery, about 6.0M lb recoverable) [4]; 9.112 at Dec 31, 2025 per the 10-K via secondary summary [5], which ties to the company's combined 21.0 M&I [3] (prov.). Ur-Energy reports no reserves (initial assessment basis). The company's stated 34.3% inferred increase does not reconcile to the 3.550M lb change (implied 52%); pounds tie to tons x grade. All figures in U.S. dollars (USD).

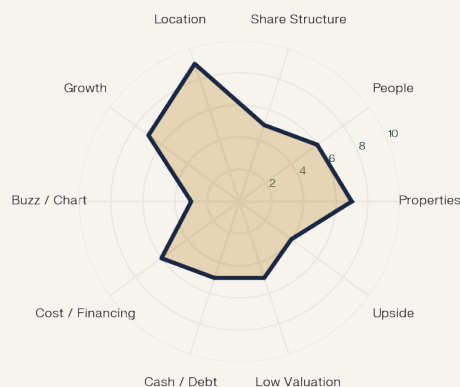

Plausible = P&P x 0.9 + (M&I minus reserves) x 0.65 + Inferred x 0.3. Lost Creek: $0 \times 0.9 + 11.868 \times 0.65 + 10.357 \times 0.3 = 7.714 + 3.107 = 10.82$ Mlb. Shirley Basin: $0 \times 0.9 + 9.112 \times 0.65 + 0 \times 0.3 = 5.92$ Mlb. Total 16.74 Mlb.

10-Factor Analysis

FACTOR	SCORE	RATING	RATIONALE
Properties / Ownership	7	Strong	100% owned Wyoming ISR; 21.0 Mlb M&I but small scale [3][5]
People / Management	6	Fair	Record Q2 output [1]; insider ownership not verified
Share Structure	5	Fair	398M basic, about 475M if converted [2]; 200-500M band
Location	9	Excellent	USA / Wyoming, Tier 1
Projected Growth	7	Good	Q2 140,873 lb vs 2.0M lb/yr permitted annual production [1][3]; ramp unproven
Good Buzz / Chart	3	Weak	\$1.10 vs \$1.39 at start of year (-21%) [6]
Cost / Financing	6	Fair	Lost Creek \$44.30/lb pre-tax all-in [3]; Shirley Basin \$54.89/lb all-in [4]
Cash / Debt	5	Weak	\$95.3M cash vs \$120M convertible face [1][2]
Low Valuation Estimate	5	Fair	EV about \$462M, about \$28 per plausible lb (provisional)
Upside Potential	4	Weak	\$100 case +3%; \$85 case 38% below price
Total	57 / 10 =	5.7	

Table 3. Equal-weighted, scored 1-10 under the Durrett 2.2 rubric. Judgment calls: People, Share Structure, Cost/Financing, Cash/Debt, Valuation, Upside. Buzz/Chart rests on price drift only (no moving-average data). All figures in U.S. dollars (USD).

Radar Chart

Valuation: Sum of the Parts

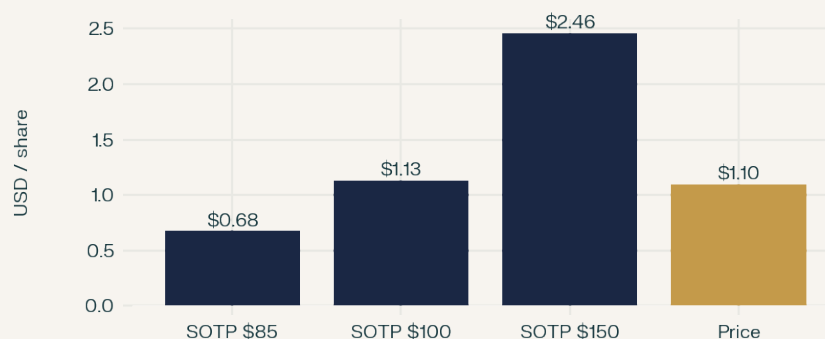

Margin per lb = U3O8 price minus 1.3x AISC (tax provision included). Annual production = attributable plausible pounds divided by mine life, flat, discounted at 5% (mid-year) and multiplied by the stage factor. Shirley Basin initial capex is deducted at present value. Stage factors: 0.80 for Shirley Basin follows the Durrett 2.2 convention in the Denison review; 1.00 for a producing mine is an assumption (stage table not extractable).

PROJECT	ATTRIB. Mlb	START (yrs)	LIFE (yrs)	AISC \$/lb	PADDED AISC	STAGE
Lost Creek	10.82	0.5	13	44.30	57.59	1.00
Shirley Basin	5.92	1.0	6	48.11	62.54	0.80

Table 4. Lost Creek AISC = company total cost per pound before income tax, \$44.30 (post-tax \$54.89) [3]; life to Q2 2039 from Dec 2025 (about 13 years). Shirley Basin AISC = all-in \$54.89/lb less initial capex \$40.7M / 6.0M lb recoverable (\$6.78) = \$48.11 [4]; life about 6 years at 1.0M lb/yr (assumed). Start dates assumed. All figures in U.S. dollars (USD).

USD MILLIONS	\$85	\$100	\$150
Lost Creek NAV (stage-weighted)	220	340	740
Shirley Basin NAV	90	150	351
Project NAV	310	490	1,091
Less: future capex (PV, Shirley Basin)	(40)	(40)	(40)
Net cash / (debt); converts convert at \$150	(25)	(25)	95
Plus: finished inventory (Dec 2025)	24	24	24
Equity value	270	450	1,171
Shares used (M)	397.9	397.9	475.3
Per share	\$0.68	\$1.13	\$2.46
vs. current price	-38%	+3%	+124%

Table 5. Cash \$95.3M (Q2 2026) [1]; converts \$120M face, 4.75% due 2031, convert at about \$1.73 [2]. At \$85 and \$100 value per share is below \$1.73, so the converts stay as debt on 397.9M basic shares; at \$150 they convert (69.2M shares plus 8.27M options gross, 475.3M; debt removed). Capex is the full \$40.7M initial capex from the technical report [4], discounted 0.5 years; part is already spent and in the cash figure, so this is conservative. Wastewater facility cost not included. Inventory \$24.3M at Dec 31, 2025 [3]. All figures in U.S. dollars (USD).

Sensitivities

CASE (\$100 URANIUM)	PER SHARE	VS. BASE
Base case	\$1.13	n/a
Lost Creek NAV 15% lower	\$1.00	-11%
\$100M equity raise at \$1.10 (90.9M shares)	\$1.12	-1%

Table 6. Illustrative; the 15% haircut and the raise are analyst assumptions. All figures in U.S. dollars (USD).

Analyst Cross-Check

No analyst target data was retrieved for this review. Add broker and aggregator targets before distribution.

Input Assumptions Disclosure

INPUT	VALUE	BASIS
U3O8 price	\$85 / \$100 / \$150, flat	Client scenarios; not a forecast
Discount rate / cost pad	5% mid-year / 1.3x	Client instruction
Capex	Shirley Basin \$40.7M (PV \$39.7M)	Technical report [4]; remaining spend unknown
FX	n/a (USD reporter)	Company reports in USD
Start dates	Lost Creek 0.5 yrs; Shirley Basin 1.0 yrs	Assumption
Cash / debt	\$95.3M / \$120M face	Q2 2026 release [1]; 10-Q [2]
Shares	397.9M basic; options 8.27M; convert 69.2M	10-Q, Jul 31, 2026 [2]; option strikes not verified; warrants essentially all exercised [3]

Table 8. Every secondary-source input and assumption is labeled. All figures in U.S. dollars (USD).

Capital Raise Outlook (18 months)

Probability of a meaningful raise (about \$50M or more): about 30%; forced raise: about 10%. Cash of about \$95M plus about \$24M of inventory compares with up to \$40.7M of Shirley Basin initial capex (part already spent), an operating loss, and 2.0M lb/yr permitted capacity still to be built out; the \$120M convertible is due in 2031 [1][2][3][4]. This section is analyst judgment, not a sourced forecast.

Red Flags and Investor Concerns

Red Flag: Shirley Basin ramp (Execution): mining began in 2026 against 1.0M lb/yr of licensed capacity and a filed all-in cost of \$54.89/lb; Q2 output for the whole company was 140,873 lb [1][4][7].

Red Flag: Share Structure (5): 398M basic and about 475M if the \$120M notes convert [2].

Red Flag: Good Buzz / Chart (3): price \$1.10 against \$1.39 at the start of the year [6].

Red Flag: Cash / Debt (5), Low Valuation (5), Upside Potential (4): \$95.3M cash against \$120M of notes; the \$100 case is only 3% above the price [1][2].

Observations and Next Steps

Verify Shirley Basin M&I in the Dec 2025 10-K table, option strikes, restricted cash, remaining Shirley Basin capex and the wastewater facility cost. Next catalyst: Q3 2026 results (expected November). The project RAG JSON (merged 2026-01-30) does not contain URG.

Data Quality Audit

Data Quality Score 7.40 / 10 (accuracy 7.0, hallucination control 8.0, sycophancy 8.0; weighted 0.5 / 0.3 / 0.2). Verified against company primary sources: Lost Creek resources, costs and mine life [3]; Shirley Basin technical report resources, capex and costs [4]; Q2 2026 results [1]; share count [2]. Provisional or secondary: Shirley Basin 9.112 Mlb (summary of 10-K) [5]; stage factor for producers; mine lives and start dates; market price [6]; option strikes; analyst data (none).
