Executive Summary

The updated equal-weighted score is 6.8/10. This is an analyst judgment, not a calibrated prediction or independent audit. People/Management, Share Structure, Low Valuation and Upside were reassessed using management reputation, liquidity, dilution history, exploration optionality and the October 14 price. Other factors are unchanged. Valuation-dependent scores remain conditional on the unresolved NAV model.

Working NAV remains $7.19 / $9.17 / $15.79 per diluted share at flat U3O8 prices of $85 / $100 / $150. These are carried-forward approved outputs, not newly reproduced project calculations. UEC traded near $7.79 intraday on October 14 (previous close $8.24) [S2, S7]. Against that reference the scenarios imply -7.7% / +17.7% / +102.7%. Market capitalization is about $3.86B on basic shares. These are hypothetical comparisons, not targets, and an intraday price will change.

UEC reported FY2026 output of 229,294 lb at total production cost of $39.94/lb, $495M cash, $753M liquid assets and no debt [S1]. Approved benchmarks remain $39.94 without pad for producing lines and a $45 final ongoing all-in proxy without another pad where usable costs are unavailable. Sweetwater remains $175M. General assessment: Hold / watchlist, provisional, not personalized advice.

Project List

Project / asset	Location	Effective cost $/lb	Treatment
Wyoming hub / Christensen Ranch / satellites	Wyoming, USA	39.94	Combined annual actual benchmark, no pad
Burke Hollow	Texas, USA	39.94	Combined annual actual benchmark, no pad
Palangana	Texas, USA	45.00	Final proxy; current production not established
Goliad	Texas, USA	45.00	Final proxy; initial capital unresolved
Salvo	Texas, USA	45.00	Named Texas inferred-resource line
Roughrider	Saskatchewan, Canada	26.624	$20.48 study cost × 1.30 retained
Anderson	Arizona, USA	45.00	Final ongoing all-in proxy
Yuty	Paraguay	45.00	Final ongoing all-in proxy
Workman Creek	Arizona, USA	45.00	Final ongoing all-in proxy
Sweetwater mill / properties	Wyoming, USA	Not modeled	$175M client allowance
Hobson / Irigaray infrastructure	Texas / Wyoming	Through hubs	No incremental additive value

Main projects were previously treated as 100% owned; original-source verification and full named Wyoming satellite coverage remain outstanding. Satellites already in hub pounds must not be added again.

Project Locations

Wyoming and Texas host the operating hubs, Saskatchewan hosts Roughrider, Arizona hosts Anderson and Workman Creek, and Paraguay hosts Yuty, Oviedo and Alto Parana. No new location map is inserted. Historically named holdings require ownership/status checks.

Reserves, Resources and Plausible Value

Carried-forward Mlb U3O8, not freshly verified against each technical report. The working model assumes no reserves.

Project	M&I	Inferred	Working plausible Mlb
Wyoming hub	66.200	15.100	59.476
Burke Hollow	6.155	4.883	6.574
Goliad	6.160	1.220	5.479
Palangana	0.640	1.000	0.831
Salvo	0	2.839	0.852
Roughrider	27.860	33.380	33.138
Anderson	32.055	0	26.606
Yuty	8.962	2.203	8.099
Workman Creek	0	4.459	1.338

Working formula: 0.83 × M&I + 0.30 × inferred. Workman Creek's 4.459 Mlb corrects the earlier 5.54 input; Salvo replaces the unnamed Texas remainder.

Standing instructions use 0.65 M&I, while the October 13 methodology and working values use 0.83 for no-reserve projects. This conflict is retained, not silently resolved. Plausible pounds are not regulatory resource categories or recovery probabilities.

10-Factor Analysis

Reassessed October 14, 2026. Each factor has 10% weight. Sources: FY2026 release [S1], market quotes [S2, S7], original report [S3], approved model [S4], spot reference [S8]. Scores are analyst judgments; valuation scores remain provisional.

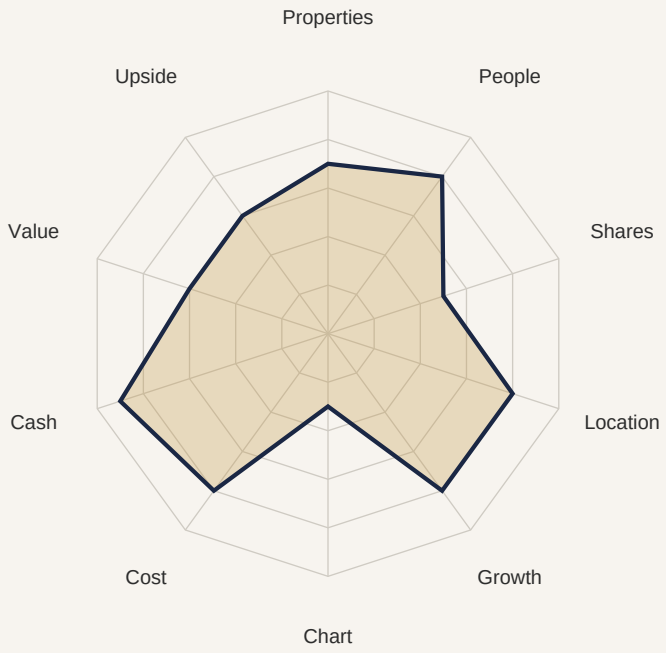

Factor	Score	Rating	Rationale / source
Properties / Ownership	7	Good	Two producing mines, Ludeman construction and Roughrider PFS work support the portfolio; historical and proxy assets limit confidence. [S1, S3]
People / Management	8	Strong	Founder-led management with strong industry name recognition and reputation (analyst judgment); delivered Burke Hollow start-up and Christensen Ranch expansion. Insider ownership not verified. [S1]
Share Structure	5	Fair	503.3M diluted, just above the 500M tier line. $495M cash, $753M liquid assets and no debt reduce near-term need to issue, but the $600M ATM remains open and about 34.2M shares (7.4%) were issued in the 12 months to July 2026. Count provisional. [S1, S3]
Location	8	Strong	Main operations in USA and Roughrider in Canada; expanded model includes Paraguay, so no blanket Tier 1 claim. [S1, S3]

Factor	Score	Rating	Rationale / source
Projected Growth	8	Strong	Q4 output increased 157%; Ludeman and header-house development support growth, but licensed capacity is not guidance. [S1]
Good Buzz / Chart	3	Weak	Oct 14 intraday $7.79 (about –5.4%) after Oct 13 close $8.24 (–6.68%); weak momentum. No moving-average test performed. [S2, S7]
Cost / Financing	8	Strong	FY2026 total cost $39.94/lb and Q4 $36.54/lb support margins; tax and proxy-cost coverage remain unresolved. [S1]
Cash / Debt	9	Excellent	$495M cash, $753M liquid assets and no debt at July 31, 2026; substantial development funding remains. [S1]
Low Valuation Estimate	6	Fair	At $7.79, the $100 working NAV is 17.7% above price and the $85 case is 7.7% below. EV about $3.2B, about $22 per working plausible lb versus roughly $90/lb uranium. Conditional on the unreconciled NAV. [S4, S7, S8]
Upside Potential	6	Fair	$150 working NAV is 2.03× price (+102.7%). Large unexplored acreage and exploration targets (Oviedo 23.1–56.0 Mlb target, Burke Hollow extension, historical Sweetwater/Wyoming pounds) are carried at zero: qualitative credit, not dollars. Conditional. [S4, S7]
Total / average	68 / 10 = 6.8	Provisional	Valuation-dependent factors conditional

Share Structure was raised from 4 to 5, not higher: the strong balance sheet lowers near-term issuance risk, but the open ATM and recent issuance history do not support a claim that dilution is unlikely. People / Management reflects an analyst reputation judgment, not a sourced insider-ownership test.

Radar Chart

Current scores only, navy outline and gold fill, scale 0–10. Equal-weighted average 6.8/10.

Chart

Current scores | Average 6.8/10

Valuation: Sum of the Parts

Margin = uranium price minus effective cost in the Project List. No further pad applies to $39.94 actual benchmarks or $45 proxies. Discount rate 5%, mid-year. Initial capital is separately deducted and stage-weighted.

Operating NAV = stage × sum[(plausible pounds / life) × (price – cost) / 1.05^(start delay + production year – 0.5)].

Project	Start delay	Life	Stage	Initial capital
Wyoming hub	1 year	14 years	1.00	Satellite reconciliation outstanding
Burke Hollow	1 year	10 years	1.00	Wellfield/sustaining coverage unresolved
Goliad	3 years	8 years	0.40	Missing
Palangana	Undocumented	Undocumented	1.00 retained	Not proof of current production
Salvo	Undocumented	Undocumented	0.40	Missing
Roughrider	6 years	Prior model 4 years	0.40	$545M study budget; remaining spend unverified
Anderson	8 years	12 years	0.40	$319M assumed
Yuty	8 years	10 years	0.40	$97M assumed
Workman Creek	8 years	5 years	0.40	$16M assumed

Proxy capital used $12 per plausible pound from an ISR reference, not engineering estimates; conventional Arizona comparability is weak. Roughrider's prior four-year model life conflicts with the nine-year study life cited

earlier. No correction is hidden in the carried-forward NAV.

Equity-value bridge

USD millions except per share. The operating subtotal is implied from the retained bridge, not independently rerun. All nine modeled project/hub lines are included; latest individual NAV allocations are pending. Rounding can cause small differences.

Component	$85	$100	$150	Basis
Operating project NAV subtotal	2997.8	3973.0	7223.0	Implied; nine modeled lines
Stage-weighted capital PV	(293.8)	(293.8)	(293.8)	Prior deduction
Sweetwater mill / package	175.0	175.0	175.0	Client allowance
Cash	495.0	495.0	495.0	July 31, 2026 [S1]
Other liquid assets incl. URC	149.0	149.0	149.0	Derived allocation
Held uranium 1.256 Mlb	106.8	125.6	188.4	Scenario mark
Plant material 0.359 Mlb	30.5	35.9	53.9	Rounded proxy; reconcile
Reclamation liability	(43.1)	(43.1)	(43.1)	Prior input
Green Mountain	0	0	0	No increment beyond Sweetwater
Red Desert	0	0	0	No increment beyond Sweetwater
Other Sweetwater acreage	0	0	0	Package context
Remaining Wyoming district	0	0	0	Historical; overlap unresolved
Los Cuatros	0	0	0	Historical
Dalton Pass	0	0	0	Historical
C de Baca	0	0	0	Historical
Oviedo	0	0	0	Exploration target
Burke Hollow extensions	0	0	0	Exploration target
Alto Parana	0	0	0	Non-uranium optionality
Slick Rock	0	0	0	Conflicting ownership references
Salamanca	0	0	0	Current status unverified
UR&C	0	0	0	Unquantified business
Hobson plant	0 incremental	0 incremental	0 incremental	Texas NAV support
Irigaray infrastructure	0 incremental	0 incremental	0 incremental	Wyoming NAV support
Equity NAV	3617.2	4616.4	7947.2	Working outputs
NAV/share: 503.3M diluted	7.19	9.17	15.79	Retained denominator

Sweetwater's $175M is an acquisition-package allowance assigned to the mill line, not verified mill-only book value or a floor. Acquired properties are not valued twice. Zero means unquantified, not worthless. Unexplored acreage and exploration targets are an unquantified upside not captured above.

Exploration and sale-value inventory

Asset	Prior discussion context	Treatment
Green Mountain / Red Desert	About 175 Mlb historical	Not compliant modeled pounds
Remaining Wyoming district	72.5 Mlb historical	Overlap unresolved
Los Cuatros	12 Mlb historical	Excluded
Dalton Pass	4.43 Mlb historical	Excluded
C de Baca	0.5 Mlb historical	Excluded
Oviedo	23.1–56.0 Mlb target	Not resource
Burke Hollow extension	1.8–7.2 Mlb target	No added modeled pounds
Alto Parana	Titanium/vanadium	Sale/JV optionality
Slick Rock / Salamanca	Historically named	Current ownership required
UR&C	Conversion strategy	Funding/economics unresolved

The consolidated RAG attributes Slick Rock to Anfield, conflicting with the earlier UEC listing. Keep it as a verification item, not a confirmed UEC asset or additional value. No speculative transaction values are assigned.

Sensitivities

Each case changes one item from the $100 working base ($9.17). Results are arithmetic adjustments to the working equity value, not reruns of the project model. Cases that need the model (0.65 M&I weight, production ramp, cost and capital stress) are listed under Next Steps, not shown.

Case at $100 uranium	NAV/share	vs. base	Basis
Working base	9.17	n/a	Approved working outputs
Full (unweighted) remaining capital	8.29	-9.5%	Capital PV rises by $441M (293.8 ÷ 0.40 – 293.8)
Corporate G&A deducted	8.48	-7.6%	FY2026 G&A $34.47M/yr for 14 years, 5% mid-year, PV $350M; pre-tax; assumed to continue
Sweetwater allowance removed	8.82	-3.8%	$175M ÷ 503.3M shares
Plant material excluded	9.10	-0.8%	0.359 Mlb × $100 removed, not yet reconciled
$500M equity raise at $7.79	9.02	-1.7%	Adds 64.2M shares and $500M; no fees; illustrative

Illustrative; assumptions are analyst judgments. The $9.17 base is 17.7% above $7.79.

Analyst Cross-Check

Yahoo Finance returned an average target of $16.03 and a high of $26.75 against a prior-day quote [S5]. Secondary, dated, not an independently calculated consensus. Historical October 9 targets: Yahoo/Gotrade $16.12 average, Business Insider $17.28 median, HC Wainwright $26.75, Jefferies $11.50, RBC $10.00. Individual targets not freshly checked.

Input Assumptions Disclosure

$85 / $100 / $150 are scenarios, not forecasts. 5% is client-directed. $39.94 is combined production cost, not comprehensive after-tax AISC. $45 is intended as a final tax-inclusive ongoing allowance with no verified build-up; construction capital is separate. Roughrider retains $20.48 × 1.30 pending decomposition. Corporate overhead is not deducted in the base case (see Sensitivities).

Company cost includes noncash depreciation/depletion/amortization, production royalties and ad valorem/severance taxes, excluding sales royalties from this measure [S1]. Producing lines have no explicit income-tax deduction after removing the pad. Reconcile capital and noncash charges. Sweetwater conversion/holding and satellite capital remain unresolved.

UEC distinguishes 1,256,000 lb held inventory from 359,260 lb of plant/extraction material excluded from its liquid-asset tally [S1]. The rounded 0.359 Mlb line still needs status/accounting reconciliation.

Capital Raise Outlook (18 months)

The October 9 report estimated about 55% probability of a meaningful raise and under 5% forced-raise probability: historical analyst judgments, not calibrated probabilities or refreshed forecasts. Review the ATM, cash burn, remaining capital and subsequent issuance.

Capital Raise History

Period	Event	Size USD	Price USD	Shares M	Approx. dilution
Oct 2, 2025	Flow-through	$8.6M	15.01	0.58	0.1%
Oct 6, 2025	Public offering	$203.8M	13.15	15.5	3.4%
Aug 2025–Jan 2026	2024 ATM	$102M	10.12 avg	10.08	2.1%
Nov 2025–Jan 2026	2025 ATM	$108M / $600M	18.75 avg	5.76	1.2%
Feb–Apr 2026	Subsequent ATM	$14.8M	16.99 avg	0.87	0.2%
May–Jul 2026	Subsequent ATM	Not found	Not found	1.39	0.3%
Aggregate	Aug 2025–Jul 2026	$437.2M+	Unreconciled	34.2	About 7.4%

Historical S3 transcription, not newly audited; approximate dilution/proceeds need reconciliation.

Red Flags and Investor Concerns

Red Flag: Share Structure (5/10). 503.3M diluted shares sit just above the 500M tier line and the $600M ATM remains open; strong cash and no debt reduce, but do not remove, dilution risk. [S1, S3]

Red Flag: Good Buzz / Chart (3/10). UEC traded near $7.79 intraday on October 14 after a 6.68% drop on October 13; near-term price weakness persists despite operating progress. [S2, S7]

Red Flag: Resource weights and model reproduction. Standing 0.65 M&I instructions conflict with working 0.83 calculations; complete project outputs remain unavailable.

Red Flag: Costs, taxes and capital. Production costs are not fully after-tax cash flows; proxy budgets and expense coverage need engineering/accounting support.

Red Flag: Ramp and permits. FY2026 output is 229,294 lb; capacity is not guidance. Sweetwater permits/refurbishment and Roughrider PFS remain development work. [S1]

Red Flag: Asset and liability verification. Sweetwater book value, satellite capital, closure coverage, historical holdings and Slick Rock ownership require review.

Observations and Next Steps

Resolve weighting, reproduce NAV, reconcile Roughrider life/capital, model ramps and run the 0.65 M&I and cost/capital stress cases, check expense coverage, finish the named Wyoming property list and verify holdings and diluted shares. Retain approved no-pad costs and the Sweetwater allowance. Refresh the quote and scorecard when a closing price is available.

Data Quality Audit

This revision refreshed an intraday October 14 quote [S7] and a spot reference [S8] and re-scored four factors; it did not rerun the project NAV. Sensitivities are arithmetic on the working equity value. The October 14 quote is intraday and will change. Valuation-dependent scores remain conditional. The historical 6.20/10 data-quality score is not reaffirmed.

The RAG merge date is January 30, 2026; records have individual last_updated fields. The September release identifies later production, Ludeman, Sweetwater, Roughrider and UR&C developments, warranting a refresh. A UEC-specific record date was not established. Preserve effective dates and source links; the Slick Rock attribution conflict requires review.

Conflicts of Interest, Holdings and Compensation

Item	Disclosure
Compensation for this analysis	Fifth Generation Advisers receives no compensation of any kind, to or from Uranium Energy Corp., its officers, directors, affiliates, underwriters or financing agents, or any other third party, in connection with this analysis.
Conflicts of interest	None.
Independence of the analysis	Prepared from public information, without review or input from Uranium Energy Corp. No analysis is free of bias; model assumptions, scores and judgment calls are ours and are identified.
Positions	As of Oct 9, 2026, positions of the firm, principals, employees and advisory clients in Uranium Energy Corp. are not material: fewer than 100,000 shares in total across all of them.
Other relationships	No investment-banking, advisory, consulting, finder or other relationship with Uranium Energy Corp. exists, and none existed in the past 12 months.
General and impersonal	General and impersonal; not tailored to any recipient and not personalized advice.
Third-party method	The 10-factor framework follows Don Durrett's published method; Fifth Generation Advisers is not affiliated with, endorsed by or compensated by Mr. Durrett.

Important Disclosures

General and impersonal information, not investment, tax or legal advice, a solicitation or a suitability review. Fifth Generation Advisers is a registered investment adviser; registration does not imply a certain level of skill or training. Hold / watchlist is a provisional general judgment. Flat scenarios are not forecasts or targets. Resources are not reserves. Plausible pounds and scores are not regulatory categories or calibrated probabilities.

The NAV is carried forward, not independently reproduced, and is not certified as after-tax or conservative. Costs, capital, ownership, timing and liabilities may materially change values. Risks include commodity prices, dilution, permits and politics, execution, overruns, liquidity, currency and estimation. Loss of all principal is possible.

Audit Trail

October 14, 2026 edit batch: conflicts section restated with no compensation or conflicts; sensitivities reworked to computable cases; People/Management 7→8, Share Structure 4→5, Low Valuation 5→6, Upside 4→6; price reference refreshed to $7.79 (intraday). Average 6.8/10. Working NAV, cost rules and the resource-weight conflict are unchanged.
