Executive Summary

IsoEnergy is a Tier 1 uranium developer with no production. It owns 100% of Hurricane in Saskatchewan (48.6 Mlb indicated at 34.5% U3O8) and Wiluna in Western Australia (69.1 Mlb M&I, historical), the latter acquired with Toro Energy on June 25, 2026 [1][5][9]. Its Utah mines moved into DISA Uranium on August 19, 2026, leaving a stake of about 33% [6]. The Durrett 10-factor score is **6.9 / 10**. With Hurricane AISC at \$31/lb and a stage weight of 0.50, our sum of the parts (1.3x AISC, 5% discount rate) gives **\$12.28, \$16.58 and \$30.93** per fully diluted share at U3O8 of \$85, \$100 and \$150, against a price near \$9.97 [4]. The \$100 case is below the RBC target of C\$25 (about US\$17.75) [7].

Development funding and dilution before production, unsourced Hurricane cost and capex inputs, and uranium price dependence are the main drags. Recommendation: **Accumulate (speculative)** below about \$12, the NAV at \$85 uranium. Data Quality Score 6.45 / 10; the audit lists what remains provisional.

\$9.97	~\$651M	6.9 / 10	+66%
PRICE (USD) [4]	MARKET CAP [1][4]	DURRETT SCORE	SOTP UPSIDE (BASE, \$100)

Recommendation: Accumulate (speculative) below about \$12, the NAV at \$85 uranium. Key risk: development funding and dilution before production.

Market cap = \$9.97 x 65.26M shares outstanding [1]; aggregator figures range from US\$632M to US\$677M [4]. The company site showed \$9.26. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Project List

PROJECT	LOCATION	OWNERSHIP	STATUS
Hurricane (Larocque East)	Athabasca Basin, Saskatchewan	100%	Resource definition; 2022 NI 43-101; PEA planned 2026 [5]
Wiluna (Lake Maitland, Centipede-Millipede, Lake Way)	Western Australia	100%; partners may earn 35% of Lake Maitland after FID	Scoping study (2024); permitted; historical JORC resources [2][3]
DISA Uranium (Tony M, Daneros, Rim, Sage Plain, Flatiron)	Utah, USA	About 33% (fully diluted)	Equity stake; closed Aug 19, 2026 [6]
Coles Hill	Virginia, USA	100%	Large undeveloped deposit; not valued [14]

Table 1. Sources: [2][3][5][6][14]. Other holdings are listed in the Other Holdings and Legacy Assets section. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Project Locations

Figure 1. Schematic map, not to scale; positions approximate [3][5][6][14]. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Reserves, Resources and Plausible Value

PROJECT	P&P	M&I total	M&I ex-reserves	INFERRED	PLAUSIBLE	ATTRIBUTABLE
Hurricane (100%)	0.0	48.6	48.6	2.7	32.40	32.40
Wiluna (100%, prov.)	0.0	69.1	69.1	4.5	46.27	46.27
Total attributable						78.67

Table 2. Millions of pounds U3O8, contained basis; no reserves are declared. Hurricane: 48.6 Mlb indicated at 34.5% and 2.7 Mlb inferred at 2.2% per the 2022 SLR technical report and current company releases [5]. Wiluna: historical estimate (73.6 Mlb total; Lake Maitland 52, Centipede-Millipede 13 and Lake Way 4 Mlb M&I; a Crux article cites 78.1 Mlb) pending NI 43-101 conversion [3][8]; flagged provisional. The Hurricane technical report is older than 3 years (flagged outdated). The Utah mines (in DISA) and Coles Hill are excluded. Resource value test: $78.67 \times 10\% \times \$85 = \$669\text{M}$ vs market cap \$651M (1.03x). All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Plausible = $P\&P \times 0.9 + (M\&I \text{ minus reserves}) \times 0.65 + \text{Inferred} \times 0.3$. Hurricane: $48.6 \times 0.65 + 2.7 \times 0.3 = 31.59 + 0.81 = 32.40$ Mlb. Wiluna: $69.1 \times 0.65 + 4.5 \times 0.3 = 44.92 + 1.35 = 46.27$ Mlb. Total attributable plausible = 78.67 Mlb.

10-Factor Analysis

FACTOR	SCORE	RATING	RATIONALE
Properties / Ownership	8	Strong	Hurricane 100%, 34.5% U3O8 indicated; Wiluna 100%; Coles Hill 100% [3][5][14]
People / Management	7	Good	Provisional; insider ownership unverified; NexGen holds 27.8% [1]
Share Structure	8	Strong	70.9M fully diluted; ATM and shelf available [1]
Location	9	Excellent	Canada, Australia, USA: Tier 1
Projected Growth	7	Good	Two development pipelines; Hurricane PEA due 2026 [1][5]
Good Buzz / Chart	5	Fair	US\$9.97 vs 52-wk 7.19-13.58; RBC Outperform [4][7]
Cost / Financing	6	Fair	Wiluna AISC \$30.55 [2]; Hurricane \$31 provisional
Cash / Debt	9	Excellent	C\$122.9M cash Jun 30, 2026; no material debt [1]
Low Valuation Estimate	5	Fair	About 0.8x NAV at \$85; EV about US\$4/lb M&I
Upside Potential	5	Fair	NAV +66% at \$100, +210% at \$150; production more than 5 years away
Total	69 / 100	6.9	

Table 3. Equal-weighted, scored 1-10 under the Durrett 2.2 rubric. People / Management is provisional. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Radar Chart

Valuation: Sum of the Parts

Margin per lb = U3O8 price minus 1.3x AISC. Production is even over mine life (L/N), cash flows are discounted at 5% (mid-year) and multiplied by the stage factor of 0.50. Wiluna capex is deducted at its undiscounted face value of about \$203M (client input); Hurricane capex and corporate overhead are not deducted.

PROJECT	ATTRIB. Mlb	START (yrs)	LIFE (yrs)	AISC \$/lb	1.3x AISC	STAGE
Hurricane	32.40	7.0 (assumed)	15 (assumed)	31.00 (prov.)	40.30	0.50
Wiluna	46.27	5.0 (assumed)	17.5	30.55	39.72	0.50

Table 4. Wiluna AISC from the Lake Maitland scoping study update (Jul 2024) [2]; Hurricane AISC of \$31/lb is a provisional client assumption with no technical-report basis. Start dates and mine lives are assumptions. The 0.50 stage factor is a client assumption applied to both projects. All figures in U.S. dollars

(USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

USD MILLIONS	\$85	\$100	\$150
Hurricane NAV (stage-weighted)	365	487	896
Wiluna NAV (stage-weighted)	552	735	1,344
Project NAV	917	1,222	2,240
Less: Wiluna capex (about \$203M)	(203)	(203)	(203)
Plus: cash (C\$122.9M, Jun 30)	87	87	87
Plus: marketable securities (about C\$52M)	37	37	37
Plus: DISA stake (at cost)	33	33	33
Equity value	871	1,176	2,194
Fully diluted shares (M)	70.9	70.9	70.9
Per share	\$12.28	\$16.58	\$30.93
vs. current price (\$9.97)	+23%	+66%	+210%

Table 5. Fully diluted shares = 65.26M basic + 5.53M options (gross, no exercise proceeds) + 0.15M RSUs [1]; recent option grants averaged an exercise price of \$13.37, above the share price, so the gross count is conservative. Cash of C\$122.9M at Jun 30 predates the August DISA transaction, so the DISA stake at cost (\$33M) may overlap with it. Marketable securities (about C\$52M) are not independently verified. Hurricane capex and corporate overhead are not deducted. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Sensitivities

CASE (\$100 URANIUM)	PER SHARE	VS. BASE
Base case (Hurricane AISC \$31, padded 40.30; stage 0.50)	\$16.58	n/a
Hurricane valued at zero	\$9.71	-41%
Hurricane AISC \$40	\$15.24	-8%
Hurricane AISC \$55 (padded 71.50)	\$12.99	-22%
Lake Maitland 35% partner right (partner funds 35% of capex)	\$14.86	-10%
Wiluna start delayed to year 8	\$15.17	-9%
Wiluna AISC \$40 (padded 52)	\$14.47	-13%
Stage factor 0.40 instead of 0.50	\$13.14	-21%
8% discount rate (reference)	\$11.42	-31%

Table 6. Illustrative. The Lake Maitland case gives up 35% of Lake Maitland's NAV (about 26% of Wiluna) and assumes the partner funds 35% of the capex. The 8% rate is shown for reference only. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Analyst Cross-Check

SOURCE	RATING	TARGET (USD)
RBC Capital (initiated Oct 1-2, 2026) [7]	Outperform	C\$25 (about \$17.75)
Street average (Globe and Mail via ad-hoc-news, Oct 2, 2026) [10]	n/a	C\$23.13 (about \$16.42)
KoalaGains (Nov 2025, secondary)	n/a	C\$15-22 fair value (about \$10.65-\$15.62)

Table 7. Converted at 0.71 USD/CAD. Aggregator data are secondary; targets are in Canadian dollars on the TSX line. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Other Holdings and Legacy Assets

Equity holdings. IsoEnergy owns shares in other uranium companies: NexGen Energy, Premier American Uranium, Atha Energy, Purepoint Uranium, Future Fuels, Jaguar Uranium, Orpheus Uranium and Verdera Energy, plus Royal Uranium at cost [1][11]. The company valued the portfolio at about C\$46.0M (US\$32.7M) at the Sep 28, 2026 close, excluding DISA [11]. The largest position I could size is Premier American Uranium, where IsoEnergy held 6,381,601 shares and 2,876,335 warrants (9.42% basic) after a Dec 30, 2025 purchase [12]. NexGen is also IsoEnergy's largest shareholder at 27.8%, so the holding is partly circular [1].

DISA stake. IsoEnergy received 1,677,350 DISA shares for the Utah portfolio and invested US\$33M of a US\$105M private placement; the financing implies a pro forma fully diluted equity value of about US\$505M, so 33% is about US\$167M against the \$33M carried in Table 5 [6][13]. It is a private, illiquid minority stake. The company also has US\$4M of convertible debentures outstanding [1].

Physical uranium. None found: the Q2 2026 MD&A and the Sep 2026 corporate presentation describe cash, equities and mineral properties only [1][11]. The full balance sheet was not reviewed, so this should be confirmed against the financial statements.

LEGACY ASSET (CONSOLIDATED URANIUM)	STATUS	IN SOTP?
Tony M, Daneros, Rim (Utah mines, bought from Energy Fuels in 2021)	Contributed to DISA Uranium Aug 19, 2026 [6][15]	Via DISA stake
Sage Plain and Flatiron projects (Utah)	Contributed to DISA Uranium [6]	Via DISA stake
Eight DOE leases (Colorado, from the 2021 Energy Fuels deal)	Current status not confirmed [15]	No
Coles Hill (Virginia, acquired with Virginia Energy in 2022)	100% IsoEnergy; largest undeveloped US deposit; needs a favorable regulatory environment [14]	No
Henry Mountains Complex (Utah)	Appears in 2025 US spending; status after DISA not confirmed [1]	No
Radio, Thorburn Lake (50%), Matoush and other Athabasca / Quebec properties; Dorado (Purepoint JV, 50%)	Held; historical estimates only [1]	No

Table 7a. Utah mines carry toll-milling agreements with Energy Fuels [1]. Items marked No add unquantified upside; none has a current NI 43-101 resource in the sources reviewed. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Input Assumptions Disclosure

INPUT	VALUE	BASIS
U3O8 price	\$85 / \$100 / \$150, flat	Client scenarios; not a forecast
Discount rate / cost pad	5% mid-year / 1.3x AISC	Client instruction
Stage factor	0.50, both projects	Client assumption
Capex by project	Wiluna about \$203M; Hurricane not deducted	Scoping study [2]; Hurricane unsourced
Hurricane AISC	\$31/lb	Client assumption; provisional
FX	0.71 USD/CAD	Client rate
Start dates	Hurricane 7.0 yrs; Wiluna 5.0 yrs	Assumptions; no FID or PEA yet
Cash / debt	\$87M / none material	Q2 2026 MD&A, Jun 30 [1]; pre-DISA
Shares	70.9M fully diluted	[1]: basic, gross options and RSUs

Table 8. Every secondary-source input and assumption is labeled. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Capital Raise Outlook (18 months)

Probability of a meaningful raise: **about 45%**; forced raise: **about 5%**. Cash is about US\$87M plus about US\$37M of securities against Wiluna capex of about US\$203M; an ATM program and a base shelf prospectus are in place [1]. Shares outstanding rose about 18% in H1 2026 through the January financing and the Toro acquisition (Table 9). This section is analyst judgment, not a sourced forecast.

DATE	EVENT	SIZE	PRICE	NEW S HARES	DILUTI ON	VALUE / SH. AFTER*
Jan 27, 2026	Bought deal (3.83M) plus NexGen private placement (1.67M) [1]	C\$82.5M (US\$58.6M)	C\$15.00 (US\$10.65)	5.50M	+10%	n/a
Apr 17, 2026	ATM program launched, up to C\$50M [1]	up to C\$50M	market	unknown	unknown	n/a
Jun 25, 2026	Toro Energy acquisition (share exchange) [1]	C\$64.1M value (US\$45.5M)	C\$14.55 (US\$10.33)	4.40M	+7%	n/a
Aug 19, 2026	DISA Uranium transaction [6]	US\$33M invested	n/a	none	none	n/a
H2 2027 (assumed)	Hurricane pre-development / ATM draw	US\$50M	\$9.97	5.0M	+7%	\$16.15
2028 (assumed)	Wiluna construction funded by equity	US\$203M	\$9.97	20.4M	+29%	\$15.11

Table 9. Dates, sizes and prices from the Q2 2026 MD&A [1], which reports in Canadian dollars. Shares before the 2026 issuances are about 55.4M. Rows marked assumed are illustrative at the current price. *Value per fully diluted share at \$100 uranium (Table 5 basis) plus proceeds. All figures in U.S. dollars (USD); Canadian-dollar figures converted at 0.71 USD/CAD (client rate).

Red Flags and Investor Concerns

Red Flag: Good Buzz / Chart (5): neutral pattern; US\$9.97 vs 52-week range 7.19-13.58 [4].

Red Flag: Low Valuation Estimate (5): the resource value test is only 1.03x market cap, and NAV depends on the 0.50 stage weight (stage 0.40 gives \$13.14 at \$100).

Red Flag: Upside Potential (5): production is more than 5 years away; Hurricane and Wiluna start dates are assumptions.

Red Flag: Unsourced inputs: the Lake Maitland 35% partner right, Hurricane capex, G&A and the \$31 AISC are not sourced; Wiluna resources are historical and not NI 43-101 compliant [2][3].

Red Flag: DISA minority exposure and uranium price dependence: the stake is a private minority holding; value is highly sensitive to uranium price (+210% at \$150, +23% at \$85) [6].

Observations and Next Steps

Catalysts: Hurricane PEA (2026), Tony M PEA (now inside DISA), Wiluna NI 43-101 conversion, and Q3 financials. Verify: Hurricane AISC and capex, option strikes (treasury-method count), post-DISA cash, the status of Henry Mountains and the Colorado DOE leases, and the balance sheet for any physical uranium. The project RAG JSON (merged 2026-01-30) has no ISOU entry; an update is recommended.

Data Quality Audit

Data Quality Score 6.45 / 10 (accuracy 5.5, hallucination control 7.0, sycophancy 8.0; weighted 0.5 / 0.3 / 0.2; self-assessed). Verified against company primary sources: share count, options and RSUs (65,256,428 / 5,530,783 / 145,833), June 30 cash, 2026 issuances and equity holdings [1]; Hurricane resource [5]; DISA closing terms [6][13]; RBC target [7]. Provisional or secondary: Wiluna resources and scoping AISC [2][3][8]; Hurricane AISC and capex; the C\$52M securities figure; cash overlap with the DISA stake; price and market cap [4]; analyst data [7][10].
