Uranium Energy Corp. (NYSE American: UEC)

Analysis date: October 13, 2026. Formatting revision: navy warning heading, red callout, current-score-only presentation.

Executive Summary

The updated equal-weighted score is 6.3/10. This is an analyst judgment, not a calibrated prediction or independent audit. The scorecard reflects dilution, portfolio jurisdiction, ramp risk and recent weak price action. Valuation-dependent scores remain conditional on the unresolved NAV model.

Working NAV remains $7.19 / $9.17 / $15.79 per diluted share at flat U3O8 prices of $85 / $100 / $150. These are carried-forward approved conversation outputs, not newly reproduced project calculations. October 13 reported close $8.24, down 6.68%, implies scenario comparisons of –12.7% / +11.3% / +91.6% [S2, S4]. These are hypothetical comparisons, not targets.

UEC reported FY2026 output 229,294 lb at total production cost $39.94/lb, $495M cash, $753M liquid assets and no debt [S1]. Approved benchmarks remain $39.94 without pad for producing lines and $45 final ongoing all-in proxy without another pad where usable costs are unavailable. Sweetwater remains $175M. General assessment: Hold / watchlist, provisional, not personalized advice.

Project List

Project / asset	Location	Effective cost $/lb	Treatment
Wyoming hub / Christensen Ranch / satellites	Wyoming, USA	39.94	Combined annual actual benchmark, no pad
Burke Hollow	Texas, USA	39.94	Combined annual actual benchmark, no pad
Palangana	Texas, USA	45.00	Final proxy; current production not established
Goliad	Texas, USA	45.00	Final proxy; initial capital unresolved
Salvo	Texas, USA	45.00	Named Texas inferred-resource line
Roughrider	Saskatchewan, Canada	26.624	$20.48 study cost × 1.30 retained
Anderson	Arizona, USA	45.00	Final ongoing all-in proxy
Yuty	Paraguay	45.00	Final ongoing all-in proxy
Workman Creek	Arizona, USA	45.00	Final ongoing all-in proxy
Sweetwater mill / properties	Wyoming, USA	Not modeled	$175M client allowance
Hobson / Irigaray infrastructure	Texas / Wyoming	Through hubs	No incremental additive value

Main projects were previously treated as 100% owned; original-source verification and full named Wyoming satellite coverage remain outstanding. Satellites already in hub pounds must not be added again.

Project Locations

Wyoming and Texas host the operating hubs, Saskatchewan hosts Roughrider, Arizona hosts Anderson and Workman Creek, and Paraguay hosts Yuty, Oviedo and Alto Parana. No new location map is inserted. Historically named holdings require ownership/status checks.

Reserves, Resources and Plausible Value

Carried-forward Mlb U3O8, not freshly verified against each technical report. Working model assumes no reserves.

Project	M&I	Inferred	Working plausible Mlb
Wyoming hub	66.200	15.100	59.476
Burke Hollow	6.155	4.883	6.574
Goliad	6.160	1.220	5.479
Palangana	0.640	1.000	0.831
Salvo	0	2.839	0.852
Roughrider	27.860	33.380	33.138
Anderson	32.055	0	26.606
Yuty	8.962	2.203	8.099
Workman Creek	0	4.459	1.338

Working formula: 0.83 × M&I + 0.30 × inferred. Workman Creek's 4.459 Mlb corrects the earlier 5.54 input; Salvo replaces the unnamed Texas remainder.

Standing instructions use 0.65 M&I, while the October 13 methodology and working values use 0.83 for no-reserve projects. This conflict is retained, not silently resolved by scoring or formatting. Plausible pounds are not regulatory resource categories or recovery probabilities.

10-Factor Analysis

Current October 13 assessment only. Each factor has 10% weight. Sources combine FY2026 release [S1], October 13 reference price [S2], original report [S3] and approved working model [S4]. Historical inputs in S3 are not newly verified. All scores are analyst judgments; valuation scores remain provisional.

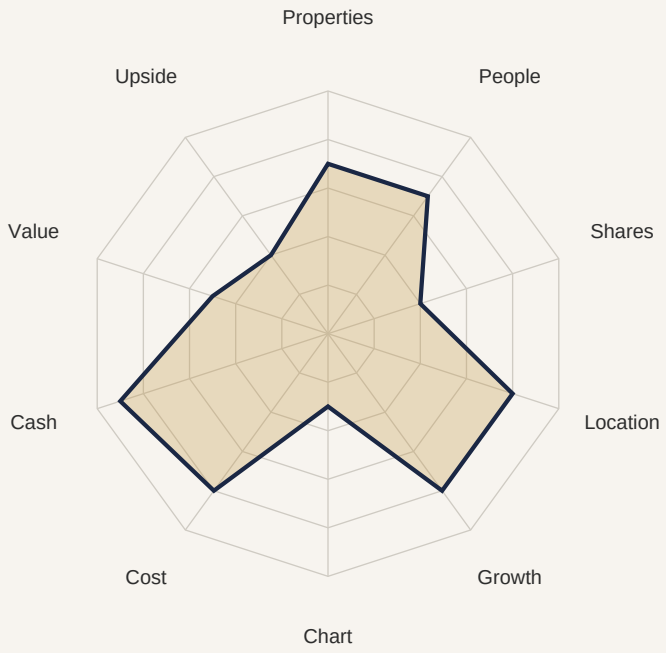

Factor	Score	Rating	Rationale / source
Properties / Ownership	7	Good	Two producing mines, Ludeman construction and Roughrider PFS work support portfolio; historical/proxy assets limit confidence. [S1, S3]
People / Management	7	Good	Burke Hollow commissioning and Christensen Ranch expansion support execution; capital allocation remains to be tested. [S1]
Share Structure	4	Weak	503.3M diluted shares retained and recurring ATM issuance create dilution exposure; count remains provisional. [S3]

Factor	Score	Rating	Rationale / source
Location	8	Strong	Main operations in USA and Roughrider in Canada; expanded model includes Paraguay, so no blanket Tier 1 claim. [S1, S3]
Projected Growth	8	Strong	Q4 output increased 157%; Ludeman and header-house development support growth, but licensed capacity is not guidance. [S1]
Good Buzz / Chart	3	Weak	October 13 reported close $8.24, down 6.68%; weak near-term action. No moving-average test performed. [S2]
Cost / Financing	8	Strong	FY2026 total cost $39.94/lb and Q4 $36.54/lb support margins; tax and proxy-cost coverage remain unresolved. [S1]
Cash / Debt	9	Excellent	$495M cash, $753M liquid assets and no debt at July 31, 2026; substantial development funding remains. [S1]
Low Valuation Estimate	5	Fair	$100 working NAV $9.17 is 11.3% above $8.24, not a deep discount; $85 case is below price. Conditional on unreconciled NAV. [S2, S4]
Upside Potential	4	Weak	$150 working NAV is 1.92× price (91.6% upside), below 2×; not an exceptional risk-adjusted opportunity. Conditional. [S2, S4]
Total / average	63 / 10 = 6.3	Provisional	Valuation-dependent factors conditional

Properties receives credit for execution/infrastructure progress, not just additional listed pounds. Location and growth incorporate expanded portfolio risk and uncertainty between capacity and actual production. A one-day decline alone does not establish a full technical-chart trend.

Radar Chart

Current October 13 scores only, navy outline and gold fill, scale 0–10. Equal-weighted average 6.3/10. Historical scores and the historical comparison line are removed.

Chart

October 13 current scores only | Average 6.3/10

Valuation: Sum of the Parts

Margin = uranium price minus effective cost in the Project List. No further pad applies to $39.94 actual benchmarks or $45 proxies. Discount rate 5%, mid-year. Initial capital is separately deducted and stage-weighted.

Operating NAV = stage × sum[(plausible pounds / life) × (price – cost) / 1.05^(start delay + production year – 0.5)].

Project	Start delay	Life	Stage	Initial capital
Wyoming hub	1 year	14 years	1.00	Satellite reconciliation outstanding
Burke Hollow	1 year	10 years	1.00	Wellfield/sustaining coverage unresolved
Goliad	3 years	8 years	0.40	Missing
Palangana	Undocumented	Undocumented	1.00 retained	Not proof of current production
Salvo	Undocumented	Undocumented	0.40	Missing
Roughrider	6 years	Prior model 4 years	0.40	$545M study budget; remaining spend unverified
Anderson	8 years	12 years	0.40	$319M assumed
Yuty	8 years	10 years	0.40	$97M assumed
Workman Creek	8 years	5 years	0.40	$16M assumed

Proxy capital used $12 per plausible pound from an ISR reference, not engineering estimates; conventional Arizona comparability is weak. Roughrider's four-year model life conflicts with nine-year study life cited earlier. No

correction is hidden in carried-forward NAV.

Equity-value bridge

USD millions except per share. Operating subtotal is implied from the retained bridge, not independently rerun. All nine modeled project/hub lines are included; latest individual NAV allocations are pending. Rounding can cause small differences.

Component	$85	$100	$150	Basis
Operating project NAV subtotal	2997.8	3973.0	7223.0	Implied; nine modeled lines
Stage-weighted capital PV	(293.8)	(293.8)	(293.8)	Prior deduction
Sweetwater mill / package	175.0	175.0	175.0	Client allowance
Cash	495.0	495.0	495.0	July 31, 2026 [S1]
Other liquid assets incl. URC	149.0	149.0	149.0	Derived allocation
Held uranium 1.256 Mlb	106.8	125.6	188.4	Scenario mark
Plant material 0.359 Mlb	30.5	35.9	53.9	Rounded proxy; reconcile
Reclamation liability	(43.1)	(43.1)	(43.1)	Prior input
Green Mountain	0	0	0	No increment beyond Sweetwater
Red Desert	0	0	0	No increment beyond Sweetwater
Other Sweetwater acreage	0	0	0	Package context
Remaining Wyoming district	0	0	0	Historical; overlap unresolved
Los Cuatros	0	0	0	Historical
Dalton Pass	0	0	0	Historical
C de Baca	0	0	0	Historical
Oviedo	0	0	0	Exploration target
Burke Hollow extensions	0	0	0	Exploration target
Alto Parana	0	0	0	Non-uranium optionality
Slick Rock	0	0	0	Conflicting ownership references
Salamanca	0	0	0	Current status unverified
UR&C	0	0	0	Unquantified business
Hobson plant	0 incremental	0 incremental	0 incremental	Texas NAV support
Irigaray infrastructure	0 incremental	0 incremental	0 incremental	Wyoming NAV support
Equity NAV	3617.2	4616.4	7947.2	Working outputs
NAV/share: 503.3M diluted	7.19	9.17	15.79	Retained denominator

Sweetwater $175M is an acquisition-package allowance assigned to the mill line, not verified mill-only book value or a floor. Acquired properties are not valued twice. Zero means unquantified, not worthless.

Exploration and sale-value inventory

Asset	Prior discussion context	Treatment
Green Mountain / Red Desert	About 175 Mlb historical	Not compliant modeled pounds
Remaining Wyoming district	72.5 Mlb historical	Overlap unresolved
Los Cuatros	12 Mlb historical	Excluded
Dalton Pass	4.43 Mlb historical	Excluded
C de Baca	0.5 Mlb historical	Excluded
Oviedo	23.1–56.0 Mlb target	Not resource
Burke Hollow extension	1.8–7.2 Mlb target	No added modeled pounds
Alto Parana	Titanium/vanadium	Sale/JV optionality
Slick Rock / Salamanca	Historically named	Current ownership required
UR&C	Conversion strategy	Funding/economics unresolved

RAG attributes Slick Rock to Anfield, conflicting with the earlier UEC listing. Keep it as verification item, not confirmed UEC asset or additional value. No speculative transaction values are assigned.

Sensitivities

Case at $100 uranium	NAV/share	Status
Working base	$9.17	Carried forward
Full unweighted capital	Pending	Reproduce schedule
0.65 M&I weighting	Pending	Resolve conflict
Production ramp	Pending	Explicit schedules
Corporate G&A	Pending	Reconcile coverage
Proxy costs/capital	Pending	Test assumptions
Exclude plant material	Pending	Inventory reconciliation

Older sensitivities are superseded, not relabeled as current.

Analyst Cross-Check

Yahoo Finance returned average target $16.03 and high $26.75 but displayed an October 12 reference quote [S5]. Secondary, dated, not an independently calculated consensus. Historical October 9 targets: Yahoo/Gotrade $16.12 average, Business Insider $17.28 median, HC Wainwright $26.75, Jefferies $11.50, RBC $10.00. Individual targets not freshly checked.

Input Assumptions Disclosure

$85 / $100 / $150 are scenarios, not forecasts. 5% is client-directed. $39.94 is combined production cost, not comprehensive after-tax AISC. $45 is intended as final tax-inclusive ongoing allowance with no verified build-up; construction capital separate. Roughrider retains $20.48 × 1.30 pending decomposition. Corporate overhead is not separately deducted.

Company cost includes noncash depreciation/depletion/amortization, production royalties and ad valorem/severance taxes, excluding sales royalties from this measure [S1]. Producing lines have no explicit income-tax deduction after removing pad. Reconcile capital and noncash charges. Sweetwater conversion/holding and satellite capital remain unresolved.

UEC distinguishes 1,256,000 lb held inventory from 359,260 lb of plant/extraction material excluded from liquid-asset tally [S1]. Separate presentation is supported, but the rounded 0.359 Mlb line still needs status/accounting reconciliation.

Capital Raise Outlook (18 months)

Original report estimated 55% probability of meaningful raise and under 5% forced raise. Historical analyst judgments, not calibrated probabilities or refreshed forecasts. Review ATM, cash burn, remaining capital and subsequent issuance.

Capital Raise History

Period	Event	Size USD	Price USD	Shares M	Approx. dilution
Oct 2, 2025	Flow-through	$8.6M	15.01	0.58	0.1%
Oct 6, 2025	Public offering	$203.8M	13.15	15.5	3.4%
Aug 2025–Jan 2026	2024 ATM	$102M	10.12 avg	10.08	2.1%
Nov 2025–Jan 2026	2025 ATM	$108M / $600M	18.75 avg	5.76	1.2%
Feb–Apr 2026	Subsequent ATM	$14.8M	16.99 avg	0.87	0.2%
May–Jul 2026	Subsequent ATM	Not found	Not found	1.39	0.3%
Aggregate	Aug 2025–Jul 2026	$437.2M+	Unreconciled	34.2	About 7.4%

Historical S3 transcription, not newly audited; approximate dilution/proceeds need reconciliation.

Red Flags and Investor Concerns

Red Flag: Share Structure (4/10). Retained diluted count exceeds 500M and recurring ATM issuance exposes holders to dilution; current securities reconciliation outstanding. [S3]

Red Flag: Good Buzz / Chart (3/10). October 13 reported close fell 6.68% to $8.24; near-term weakness persists despite operating progress. [S2]

Red Flag: Low Valuation Estimate (5/10). $100 working NAV is only 11.3% above price and $85 is below price; model uncertainties can eliminate the apparent discount. [S2, S4]

Red Flag: Upside Potential (4/10). $150 working value is 1.92× price; below 2× does not establish an exceptional risk-adjusted opportunity. [S2, S4]

Red Flag: Resource weights / model reproduction. Standing 0.65 M&I instructions conflict with working 0.83 calculations; complete project outputs remain unavailable.

Red Flag: Costs, taxes and capital. Production costs are not fully after-tax cash flows; proxy budgets and expense coverage need engineering/accounting support.

Red Flag: Ramp and permits. FY2026 output is 229,294 lb; capacity is not guidance. Sweetwater permits/refurbishment and Roughrider PFS remain development work. [S1]

Red Flag: Asset/liability verification. Sweetwater book value, satellite capital, closure coverage, historical holdings and Slick Rock ownership require review.

Observations and Next Steps

Resolve weighting, reproduce NAV, reconcile Roughrider life/capital, model ramps, check expense coverage, finish named Wyoming property list, verify holdings/diluted shares and obtain preparer disclosure approval. Retain approved no-pad costs and Sweetwater allowance.

Data Quality Audit

Prior revision checked FY2026 release [S1] and secondary October 13 quote [S2]. This formatting update performs no new research or NAV calculation. Scorecard is the current disclosed assessment; valuation factors remain conditional. Historical data-quality score 6.20/10 is not reaffirmed.

RAG merge date January 30, 2026; records have individual last_updated fields. September release identifies later production, Ludeman, Sweetwater, Roughrider and UR&C developments, warranting refresh. UEC-specific record date was not established. Preserve effective dates/source links; Slick Rock attribution conflict requires review.

Conflicts of Interest, Holdings and Compensation

Original-preparer assertions require confirmation: no compensation, public-source independence without issuer input, fewer than 100,000 aggregate shares as of October 9, and no other relationships over prior 12 months. Do not advance dates. Trading restrictions, registration/Form ADV and update policy remain unconfirmed. No Don Durrett affiliation or endorsement claimed.

Important Disclosures

General and impersonal information, not investment/tax/legal advice, solicitation or suitability review. Hold/watchlist is provisional general judgment. Flat scenarios are not forecasts or targets. Resources are not reserves. Plausible pounds and scores are not regulatory categories or calibrated probabilities.

NAV is carried forward, not independently reproduced or certified after-tax/conservative. Costs, capital, ownership, timing and liabilities may materially change values. Risks include commodity prices, dilution, permits/politics, execution, overruns, liquidity, currency and estimation. Loss of all principal possible. Adviser registration does not imply skill; preparer disclosures require confirmation.

Audit Trail

October 13, 2026 formatting batch: navy Red Flags heading, red-bordered shaded warning box kept together on one page; old-score column and historical radar comparison removed. Current score 6.3/10 unchanged. Working valuations, cost rules and model caveats retained. No new market research, resource-weight decision or valuation calculation in this step.
