Read the Conflicts of Interest and Important Disclosures sections before relying on this report.

Executive Summary

IsoEnergy is a Tier 1 (Canada, Australia, USA) uranium developer with no production and no revenue: Hurricane in Saskatchewan (100%, 48.6 Mlb indicated at 34.5% U3O8), Wiluna in Western Australia (100%, JORC 69.1 Mlb M&I), a 33% stake in DISA Uranium (the Utah mines, including Tony M), and legacy Coles Hill, Matoush and Ben Lomond carried on historical estimates [1][3][5]. The Durrett 10-factor score is 7.0 / 10. Our sum of the parts (1.3x AISC, stage factors, 5% discount rate) gives $15.46, $21.38 and $41.10 per fully diluted share at U3O8 of $85, $100 and $150, against a price near $8.24 [4]. The core assets alone give $13.29, $17.73 and $32.52; the analyst average target of about C$23 (US$16.60) sits close to that core case [7].

Main drags: costs are assumed for four of five properties and Hurricane capex is a US$250M placeholder; the DISA stake is valued at a private-placement price; legacy estimates are historical; and development capital implies dilution. Recommendation: Accumulate (speculative). Data Quality Score 5.5 / 10; Table 8 labels what remains provisional.

$8.24	~$538M	7.0 / 10	+159%
PRICE (USD) [4]	MARKET CAP [1][4]	DURRETT SCORE	SOTP UPSIDE (BASE $100)

> Recommendation: Accumulate (speculative). Core asset NAV is about 2x the price at $100, but it rests on assumed costs and long timelines; the key risk is funding and dilution before production.

Market cap = $8.24 x 65.26M basic shares [1][4]; the price is from the company site ticker on Oct 21, 2026 (Yahoo showed $9.97 on Oct 8); refresh before use. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Project List

PROJECT	LOCATION	OWNERSHIP	STATUS
Hurricane (Larocque East)	Athabasca Basin, Saskatchewan	100%	Resource definition; PEA expected 2026 [1][5]
Wiluna (Lake Maitland, Centipede-Millipede, Lake Way)	Western Australia	100%; partners may earn 35% of Lake Maitland after FID	Scoping study (May 2025); JORC resources [2][3]
DISA Uranium (Tony M, Daneros, Rim, Sage Plain, Flatiron)	Utah, USA	~33% fully diluted	Equity stake; no production; Tony M PEA Q1 2027 [5]
Coles Hill	Virginia, USA	Call option; verify	Historical estimate; state moratorium [9]
Matoush	Quebec, Canada	100%	Historical estimate [9]
Ben Lomond	Queensland, Australia	Call option; verify	Historical estimate; uranium ban [9]

Table 1. Sources: [1][2][3][5][9]. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Report Status and Key Limitations

General and impersonal. This report is a general publication, not tailored to any person, and not personalized advice. **Rating.** Accumulate (speculative) is our general opinion over 12 months as of Oct 21, 2026; it is not a recommendation to buy, hold or sell. **Scenarios, not forecasts.** Per-share values are illustrative outputs at flat U3O8 prices of $85, $100 and $150, not price targets; actual results may differ materially, including total loss. **Model limits.** Capex is deducted only for Hurricane (placeholder) and Wiluna; Coles Hill, Matoush and Ben Lomond have no capex; start dates, lives and four of five AISC values are assumed; the 30% cost pad and 5% discount rate are client instructions. **Compensation and conflicts.** See the Conflicts of Interest section.

Project Locations

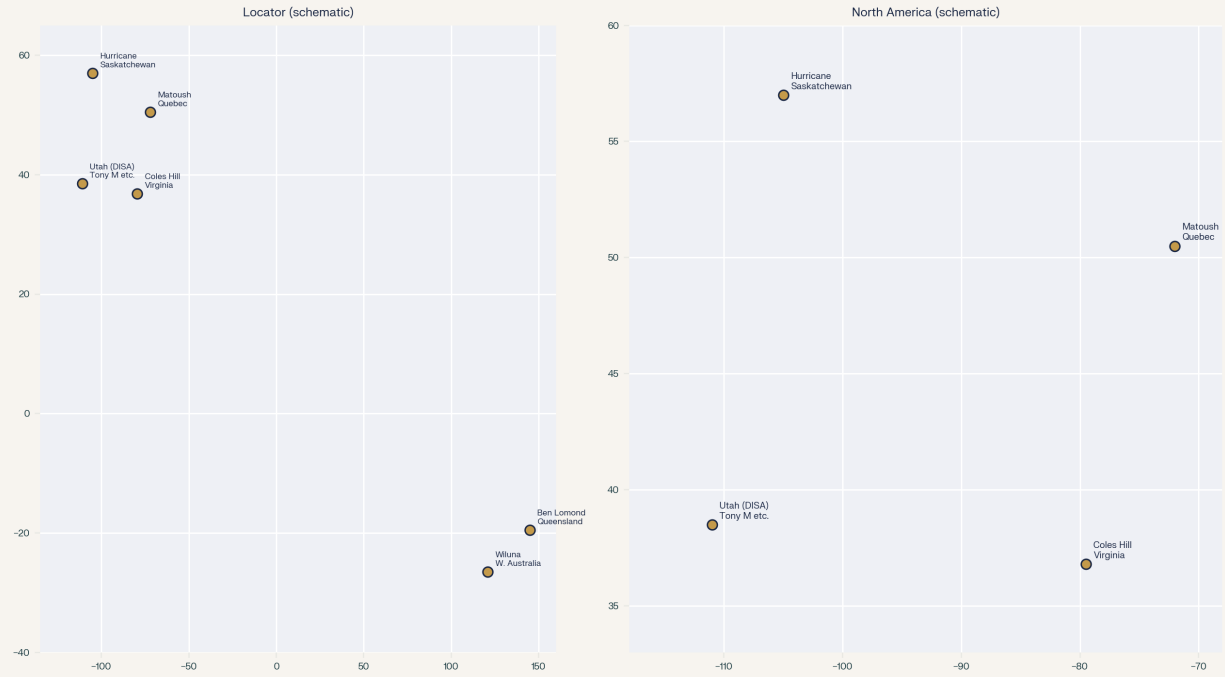

Figure 1. Schematic map, not to scale; positions approximate. The assets are on three continents and are not connected operations. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Reserves, Resources and Plausible Value

PROJECT	P&P	M&I TOTAL	M&I EX-RESERVES	INFERRED	PLAUSIBLE	ATTRIB.
Hurricane	0.0	48.6	48.6	2.7	41.15	41.15
Wiluna (JORC)	0.0	69.1	69.1	4.5	58.70	58.70
Coles Hill (hist.)	0.0	132.9	132.9	30.4	75.57	75.57
Matoush (hist.)	0.0	12.3	12.3	16.4	15.13	15.13
Ben Lomond (hist.)	0.0	8.1	8.1	2.8	7.56	7.56
Total attributable						**198.11**

Table 2. Mlb U3O8, contained basis. No proven and probable reserve is reported for any modeled project. Hurricane: SLR report (July 2022) [5]. Wiluna: JORC, three core deposits [3]. Coles Hill, Matoush, Ben Lomond: historical estimates, marked (hist.), not NI 43-101 current [9]. Milo (uranium by-product) and Dieter Lake (sold) are excluded; Utah assets are valued through the DISA stake. Resources are contained. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

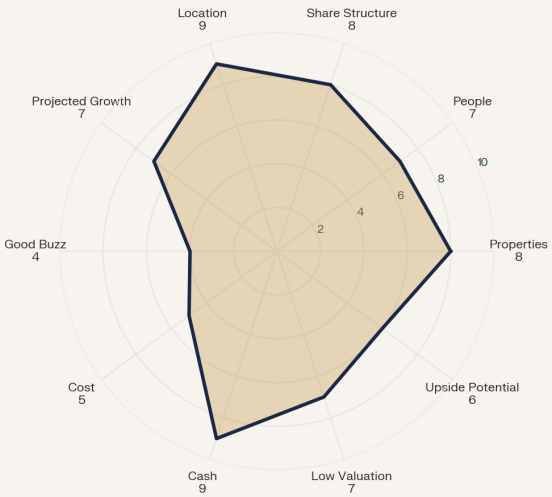

Plausible, no reserve = M&I x 0.83 + Inferred x 0.30. Hurricane: 48.6 x 0.83 + 2.7 x 0.30 = 40.34 + 0.81 = 41.15. Wiluna: 69.1 x 0.83 + 4.5 x 0.30 = 57.35 + 1.35 = 58.70. Matoush: 12.3 x 0.83 + 16.4 x 0.30 = 15.13. Ben Lomond: 8.1 x 0.83 + 2.8 x 0.30 = 7.56. Coles Hill uses 0.50 on indicated because the estimate is from 2012-13: 132.9 x 0.50 + 30.4 x 0.30 = 75.57 (client-directed). The 0.83 is a modeling weight, not a recovery probability, and is never combined with 0.65 on the same pounds.

10-Factor Analysis

FACTOR	SCORE	RATING	RATIONALE
Properties / Ownership	8	Strong	Hurricane and Wiluna 100%; legacy assets historical; Utah via 33% DISA stake [3][5]
People / Management	7	Good	Provisional; insider ownership unverified; two IsoEnergy executives on DISA board
Share Structure	8	Strong	70.9M fully diluted (gross options); ATM, shelf and US$4M convertible debenture [1]
Location	9	Excellent	Canada, Australia, USA tier 1; Virginia moratorium and Queensland ban hit legacy assets
Projected Growth	7	Good	Hurricane PEA expected 2026; Wiluna NI 43-101 conversion; Tony M PEA Q1 2027 [1][5]
Good Buzz / Chart	4	Weak	US$8.24 vs 52-wk low 7.19; analysts Buy, average target about C$23 [4][7]
Cost / Financing	5	Fair	Only Wiluna has a study AISC; other costs and Hurricane capex are assumptions [1][2]
Cash / Debt	9	Excellent	About C$70.9M cash (unverified) plus C$52M securities; burn about C$30M a year [1]
Low Valuation Estimate	7	Good	Core NAV about 2.2x price at $100; DISA and legacy values are lower confidence
Upside Potential	6	Fair	Total NAV about 5x price at $150; development timelines over 5 years
Total	**70 / 10**	**=**	**7.0**

Table 3. Equal-weighted, scored 1-10 under the Durrett 2.3 rubric. Judgment calls: factors 2, 6 and 7. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Radar Chart

Valuation: Sum of the Parts

Margin per lb = U3O8 price minus 1.3x AISC. Production is even over mine life (plausible pounds / life), discounted at 5% mid-year and multiplied by the stage factor. Remaining initial capital is discounted at 5% over the two years before start and multiplied by the same stage factor. Cash, securities and the DISA stake are added.

PROJECT	ATTRIB. Mlb	START (yrs)	LIFE (yrs)	AISC $/lb	PADDED AISC	STAGE
Hurricane	41.15	7 (assumed)	15 (assumed)	45.00 (assumed) [A]	58.50	0.40
Wiluna	58.70	5 (assumed)	16.3	28.37 [2]	36.88	0.40
Coles Hill	75.57	12 (assumed)	25 (assumed)	50.00 (assumed) [A]	65.00	0.20
Matoush	15.13	10 (assumed)	10 (assumed)	45.00 (assumed) [A]	58.50	0.20
Ben Lomond	7.56	12 (assumed)	10 (assumed)	45.00 (assumed) [A]	58.50	0.20

Table 4. [A] AISC assumption (client-directed): no AISC was found for Hurricane, Matoush, Ben Lomond or Coles Hill, so US$50/lb is assumed for Coles Hill and US$45/lb for the others; the 2012 Matoush operating cost (US$23.66) and Coles Hill breakeven (about US$45) are not AISC. Wiluna: May 2025 Lake Maitland scoping study, LOM AISC US$28.37 (C1 US$22.67, net of vanadium credit), capex US$194M, 16.3-year life [2]; the model's 3.6 Mlb a year exceeds the study's about 1.35 Mlb. Stage 0.40 for resource definition or scoping; 0.20 for assets without a current study. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

USD MILLIONS	$85	$100	$150
Hurricane NAV (stage-weighted)	220	344	759
Less: Hurricane capex placeholder (PV x 0.40) [B]	(76)	(76)	(76)
Wiluna NAV (stage-weighted)	611	801	1,435
Less: Wiluna capex (PV x 0.40)	(65)	(65)	(65)
Plus: cash (C$70.9M) and securities (C$52M)	88	88	88
Plus: DISA stake at implied value (33% x US$505M) [C]	167	167	167
Core equity value	943	1,257	2,307
Core per share (70.9M fully diluted)	$13.29	$17.73	$32.52
Coles Hill NAV	97	170	413
Matoush NAV	39	61	134
Ben Lomond NAV	18	28	61
Total equity value	1,096	1,516	2,915
Total per share	$15.46	$21.38	$41.10
vs. current price ($8.24)	+88%	+159%	+399%

Table 5. [B] Hurricane has no study: US$250M is an analyst placeholder, about 2.7 Mlb a year x US$90 per annual pound (large Athabasca projects about US$55: Rook I US$1.58B; Phoenix about C$600M); tested at US$150M to US$500M. [C] DISA: IsoEnergy contributed Utah assets for 1,677,350 DISA shares and invested US$33M in a US$105M private placement, about 33% fully diluted; the financing implies about US$505M equity value [5]. This is a private, illiquid minority valuation and later issuance (for example the Premier American Uranium deal) may dilute it. Cash is a secondary-source figure after the DISA investment [8]; fully diluted shares = 65.26M basic + 5.53M options (gross, no proceeds) + 0.15M RSUs [1]; a US$4M convertible debenture [1] is not deducted (about US$0.06 per share); no equity raise for construction is modeled. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Figure 2. Total SOTP per share vs analyst average target (C$23.36 at 0.71) and price [4][7]. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Sensitivities

CASE ($100 URANIUM)	EQUITY ($M)	PER SHARE	VS. BASE
Base case	1,516	$21.38	n/a
DISA stake at cost (US$33M)	1,383	$19.49	-9%
DISA stake at 50% of implied value	1,433	$20.20	-5%
Hurricane capex US$150M	1,547	$21.81	+2%
Hurricane capex US$500M	1,440	$20.30	-5%
Hurricane capex 100% deducted (no stage weight)	1,401	$19.76	-8%
Coles Hill at 0.83 / 0.30 weights	1,615	$22.77	+7%
Coles Hill AISC $65 (padded 84.50)	1,421	$20.04	-6%

CASE ($100 URANIUM)	EQUITY ($M)	PER SHARE	VS. BASE
Hurricane AISC $55 (padded 71.50)	1,408	$19.85	-7%
Hurricane AISC $35 (padded 45.50)	1,624	$22.90	+7%

Analyst Cross-Check

SOURCE	RATING	TARGET (USD)
Barron's, 8 ratings (Oct 16) [7]	Buy consensus	About $16.60 (23.36; range 19.00-27.15, currency presumed CAD)
Simply Wall St, 3 analysts [7]	n/a	About $13.70 (C$19.28)
RBC Capital (Oct 1) [7]	Outperform	About $17.75 (C$25)
Red Cloud (Oct 15) [7]	n/a	About $19.30 (C$27.15)

Table 7. Source: [7]. Converted at 0.71 USD/CAD; aggregators may overlap and are not an independent consensus. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Input Assumptions Disclosure

INPUT	VALUE	BASIS
U3O8 price	$85 / $100 / $150, flat	Client scenarios; not a forecast
Discount rate / cost pad	5% mid-year / 1.3x AISC	Client instruction
Capex by project	Wiluna $194M [2]; Hurricane $250M placeholder; others none	Study; analyst assumption; not available
AISC	Wiluna $28.37; Coles Hill $50; others $45	Study [2]; client-directed assumptions
FX	0.71 USD/CAD	Analyst estimate
Start dates / lives	Hurricane yr 7/15; Wiluna yr 5/16.3; Coles Hill yr 12/25; Matoush yr 10/10; Ben Lomond yr 12/10	Assumptions; no FID
Cash / debt	$50M cash, $37M securities / US$4M debenture (not deducted)	Q2 MD&A, Crux (unverified) [1][8]
Shares	65.26M basic; 70.93M fully diluted	Q2 MD&A: 5.53M options, 0.15M RSUs [1]

Table 8. Every secondary-source input and every assumption is labeled. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Capital Raise Outlook (18 months)

Probability of a meaningful raise: about 50%; forced raise: about 5%. Cash of about US$50M plus US$37M securities compares with a burn of about C$30M a year (H1 2026 cash exploration C$10.8M; trailing levered free cash flow about -C$30M) [1][4], Wiluna capex of US$194M and an unquantified Hurricane build. Tony M is funded inside DISA, so restart cash flow accrues to DISA and does not directly reduce IsoEnergy's needs; IsoEnergy may face cash calls to keep its 33%. This section is analyst judgment, not a sourced forecast.

Capital Raise History

DATE	EVENT	SIZE (USD)	ISSUE PRICE	NEW SHARES (M)	DILUTION %	SOURCE
Feb 9, 2024	Flow-through shares	C$23.0M gross	not found	not found	not found	[1]
Jun 25, 2026	Toro Energy acquisition (share consideration)	not found	n/a	about 4.4 (unverified)	about 7% (est.)	[3]
Aug 19, 2026	DISA financing (IsoEnergy investment, cash outflow)	$33M invested	n/a	none	n/a	[5]
2022	US$4M convertible debenture	$4M	conv. price not found	not found	potential	[1]
2025-26	ATM program (C$50M facility)	not found	not found	not found	not found	[1]

Table 9. Dilution % = new shares / shares outstanding immediately before the event. The debenture is potential, not issued, and excluded from actual dilution. Rows marked not found were not verified; approximate figures are estimates. All figures in U.S. dollars (USD); Canadian-dollar company figures converted at 0.71 USD/CAD (analyst estimate) [1].

Red Flags and Investor Concerns

Red Flag: Good Buzz / Chart (4): price near its 52-week low of 7.19 [4].

Red Flag: Cost / Financing (5): costs are assumed for four of five properties and Hurricane capex is a placeholder [2].

Red Flag: Valuation inputs: the DISA stake rests on a private-placement price, and Coles Hill, Matoush and Ben Lomond rest on historical estimates, with a Virginia moratorium and a Queensland ban.

Red Flag: Wiluna: 35% Lake Maitland partner right; AISC net of a vanadium credit; modeled throughput above the study [2].

Observations and Next Steps

Catalysts: Hurricane PEA (expected 2026), Tony M PEA (Q1 2027; earliest realistic restart second half of 2027), Wiluna NI 43-101 conversion, Q3 results (Nov 5, 2026). Verify: Hurricane and Coles Hill AISC and capex, Coles Hill and Ben Lomond ownership, cash after the DISA investment, debenture terms, option strikes, ATM usage, live price and FX.
